RSR-Sup.

Vancouver district has sealed several carloads of wood for the Department of Munitions & Supply and copies of S.&R.A/cs should have been received by your office.

But at date of writing no accounts have been received billing royalty, or royalty and stumpage, on this material, notwithstanding that S.&R.A/c 305937 must have reached you two weeks ago, followed by many others since.

Kindly advise.

Accountant.

Attention "Records",

With reference to your letter of the 7th inst., we wish to advise that the billing of cordwood material, for which we have received accounts from the Vancouver Office, is receiving our attention. The returns have to be checked by our Rangers, and as they are busy with the fire season we do not expect to have the matter fully completed for some time yet.

W. C. Phillips,
Assistant Forester.

BRITISH COLUMBIA SECURITY COMMISSION

360 Homer St. Vancouver B.C.

August 25, 1943.

LANDS DEPARTMENT
Forest Branch
AUG 26 1943
VICTORIA, B.C.

Mr. H. Smith,
Forestry Branch,
Victoria, B.C.

Dear Sir:

As you know this Commission operates Projects for the care of Japanese at Greenwood, Kaslo, Sandon, New Denver, Slocan, Lemon Creek, and Tashme, and in this connection, we are operating a wood-cutting scheme under authority of the Federal Government. This necessitates our acquiring timber limits for this purpose. We have been making these arrangements with the Forestry Branch at Nelson, who have required at the time the application was made for cutting rights, that a cheque accompany the application. We have no funds at these Projects for this purpose, and it has been necessary for my local Treasury Officers to issue cheques covering this from other funds, with the resulting complication in our accounting system.

As this Commission is under the Federal Government I was wondering if you would extend the usual courtesy to Government Departments of allowing your representatives to bill us here at Head Office when payment would be immediately made upon receipt of the invoice here.

If this suggestion meets with your approval I would be glad if you would advise me and also advise your representatives in the Districts concerned. I might say that the Public Works Department has granted us this privelege when we rent heavy equipment from them.

Thanking you in anticipation,

Yours truly,

E. W. HAWKINS,
Treasury Officer.

August 28, 1943

File: 0150312

Mr. E.W. Hawkins,
Treasury Office,
British Columbia Security Commission,
360 Homer Street,
Vancouver, B.C.

Dear Sir:

Your letter of the 25th instant is received in the matter of payment of accounts in connection with timber dealings with this Department.

It will be satisfactory to have all our accounts paid through your office and the District Foresters at Nelson and Kamloops will be instructed to be guided accordingly. It is suggested, however, that all our accounts be routed through your local Treasury Offices for their approval in order that your office may have no doubts as to various charges listed. Likewise all tenders and timber sale contracts for signature can be so handled. Will you please advise if this meets with your approval?

In the matter of scaling of timber products passing through your hands, it is noted cordwood shipments made to Vancouver from interior points have been officially scaled at destination. This scale is viewed only as a vendors scale and is not satisfactory for accounting purposes in that the cordwood in question has lost its identity as to origin. It will therefore be necessary to adopt one of the two following courses in order to secure the necessary information for issuance of accounts.

First, the usual monthly scale return to the local District Forester covering shipments made with information as to origin based on a flat average per car adopted for convenience purposes and as directed by the District Forestar. Secondly, if this is not satisfactory, the employment of a scaler under permit to record at each shipping point all cars loaded, with information as to origin of the material and actual cordage by the stacked

6

cord per car. This scaler would of course be at the operator's expense and employment of a Japanese for the purpose would not be permissable. Arrangements for the permit scalers would be necessary through the local District Foresters office.

If you will therefore please advise us as to which of the two above mentioned will best serve your purposes, the necessary instructions will be issued to our District Foresters. We will also appreciate your comment on the proposal to have all accounts routed to you through your local Treasury Offices, in order that the District Foresters may be so advised.

Yours truly,

Geo. P. Melrose,
Asst. Chief Forester.

B.C. Security Commission,
560 Homer Street,
VANCOUVER, B. C.

Dear Sir:

Reference is made to our letter of the 28th ultimo relating to scaling of and accounting for cordwood being cut by Japanese in the Slocan Valley and delivered to you at Vancouver.

As we are awaiting a reply to our above mentioned letter before advising the District Forester at Nelson on the method of scaling finally adopted will you please let us have your decision as requested.

We understand wood is now being delivered in Vancouver and, therefore, we are most anxious that scaling procedure be determined and put into practice without delay.

We will, therefore, appreciate your prompt attention and reply.

Yours truly,

Geo. P. Melrose

Mr. Geo. P. Melrose,
Assistant Chief Forester,
Department of Lands, Forest Branch,
Victoria, B. C.

LANDS DEPARTMENT
Forest Branch
SEP 17 1943
VICTORIA, B.C.

Dear Sir:

Re: Your File 0150312

You wrote on August 28th to our Treasury Officer, Mr. E. W. Hawkins, with reference to the method of scaling of the cordwood shipments. We have discussed this matter at some length at various times with your Mr. Byers, also with Mr. Allen, Nelson.

As mentioned in your letter, and under arrangements made by the Wood Fuel Controller, scaling is being done at unload in Vancouver. We note that this is not satisfactory to you for accounting purposes, in that the cordwood in question has lost its identity as to origin. We would point out, however, that all cars shipped now have to bear a timber mark, both on the wood itself and on the Bill of Lading, and the identity is just as exact as are the figures taken at point of shipment.

It would, therefore, appear to us that in view of the fact that all scaling is being done under direction of Mr. Byers, and the reports are issued on your S and R forms, which, incidentally, bear notation as to the timber sale number, stumpage and royalty could be settled on the basis of same. Further, it is our understanding that the Wood Fuel Controller is now arranging for a considerable quantity of our produce from the Kootenays to be routed into Trail, Rossland, etc., and that arrangements will be made through Mr. Allen of Nelson to have same scaled at unload in exactly the same manner as is now being done in Vancouver.

You will appreciate that it will be very difficult for us to explain to our auditors payment of stumpage and royalty on an approximate quantity at shipping point, when sale is made for an exact quantity at unload, as determined under direction of your own department, proved by your S and R forms, particularly in view

12

of the large discrepancies which are occurring at the present time between these two figures.

For your information, we are attaching hereto copies of statements which have been prepared covering our shipments unloaded up to September 10th. Our Mr. Mactavish is discussing the basis for stumpage and royalties for these particular shipments with Mr. Allen in Nelson to-day.

In the absence from the City of Mr. Hawkins, Treasury Officer, I have been asked by the Treasury Department to advise you that it is satisfactory to them for all your accounts to be routed through the Local Treasury Officer for their approval before payment.

Yours very truly,

BRITISH COLUMBIA SECURITY COMMISSION

SEPT. 17, 1943

M. Scaling Sup.

Attention - Mr. Byers

Attached herewith please find copy of our letter of August 28th to the B.C. Security Commission and their reply thereto of the 16th instant in reference to method of scaling to be adopted for the purpose of issuing accounts for stumpage and royalty on cordwood cut in the Japanese camps in the Nelson District and now being shipped to Vancouver.

I understand that Mr. Prowd discussed the method and place of scaling of this material with Mr. Allen, District Forester Nelson, and you and thought, therefore you may be able to shed some light on arrangements made, if any, other than that contained in the enclosed correspondence.

Apparently at the time of writing his letter of August 28th last Mr. Prowd was not willing to accept a scale at point of destination and as far as I am aware no definite decision had been reached in the matter unless subsequent discussion took place between you and Mr. Prowd who is now absent in the field.

We would appreciate any information you may have in the matter and also your comments as to the suggestion of now accepting a destination scale. It is my opinion that this material should be scaled in the usual manner at the loading point and returns made accordingly for the purpose of billing our charges.

In regard to the remarks contained in the fourth paragraph of the B.C. Security Commission's letter of the 16th instant it is difficult to understand why there should be any difference in a proper scale made at the loading point and the vendor's scale at destination. Shrinkage which they mention and which they state they could not explain to their auditors must be due to the fact that the amount shown shipped, presumably on the bill of lading, is only an approximate quantity, and conservative at that, and not a proper scale.

Can you advise if any scale returns have been forwarded to the District Forester at Nelson as to date we are not in receipt of any accounts?

S.E. Marling

Circular Letter 'I' 1943

INSTRUCTIONS RE SCALING CORD WOOD
AND STOVE WOOD FOR FUEL.

With reference to the scaling of Cordwood for fuel, whether in the round or split, it must be close piled 100% in order to be measured correctly. Close piling means just what the term implies; there must be no undue spaces caused by knots, crooked and unshapely pieces or loose and careless piling; each stick of wood must be snugly fitted into the pile in order to get a correct scale. A cord of wood is 128 cubic feet, i.e., 4 feet wide, 4 feet high and 8 feet long. Cordwood cutters should be supplied with a 4 foot measuring stick with the inches and feet plainly and permanently marked thereon, primarily for measuring the length of the cordwood but which can also be used for measuring the piles. Care should be taken to cut the cordwood the exact length, i.e., 4 feet, otherwise the scale is affected if the scaler has to make a reduction on account of a surplus of short lengths contained in the pile. Bark is included in the scale.

There are many conditions under which Cordwood has to be scaled. For instance, it may be piled on the area on which it is cut. Properly piled, this is the ideal place to scale it but at times it may have to be scaled by the truck load on the truck, in railroad cars or on scows. In all cases it must be "close piled" one hundred per cent and each row of cordwood measured for exact length, height and width and the cubical contents of each row computed separately, in order to get the correct scale. Under no circumstances can the gross cubical measurements of a railroad car, or of a scow be taken, as these measurements bear no relation to the amount of Cordwood contained therein. Scaling Cordwood by truck loads is not recommended where it can be avoided as it invariably results in an over scale owing to the large number of measurements required, hence the greater chance of error.

In measuring the height of the piles or rows of Cordwood, measurements should be made at not less than six feet intervals over the whole length of the pile, "the more the better" and the measurements totalled and divided by the number of measurements made to obtain the correct average height of the pile.

Measuring the length of the pile is more simple and easier than measuring the height but great care has to be exercised in this operation also. If the piles are longer than eight feet a 50 foot or 100 foot measuring tape should be used in preference to a scale stick or other measuring stick. The fewer measurements made in obtaining the length of a pile the greater the accuracy. It is customary to "cross pile" the ends of the rows or piles of cordwood to buttress the pile and square the ends, otherwise, without some support the ends would not be perpendicular. In cases where this "cross piling" method is used a deduction must be made to compensate for the "cross piling" as against "close piling". The difference between "cross piling" and "close piling" is approximately fifty per cent in volume, therefore, in cases where both ends of a pile is "cross piled", the length of the row or pile must be reduced by 4 feet. If only one end is "cross piled" and the other end supported by a wall or other perpendicular support, the reduction in the length of the pile would be two feet. The allowance to be made for "cross piling" however, must be left to the Scaler's judgment as this allowance varies under different conditions depending on the size of the pieces and the care taken in piling. This allowance can

15

be reduced to ~~thirty~~ three and one third per cent by a combination of careful piling and uniform sizes of the pieces.

The only deductions, therefore, which a Scaler is required to make in the measuring of Cordwood is for short lengths, cross piling and loose piling. No deductions must be made for defects of any kind. It is the cutters or operators option to eliminate defective or rotten wood unsuitable for fuel when building the pile.

Cordwood cut longer than 4 feet must be measured for length by the Scaler and recorded accordingly. Scalers measuring Cordwood and making their Official Returns to the Department must use Form FB #72 i.e., Summary of Scale, in duplicate. The width, height and length of each pile must be shown and the computations of the cordage left to the District Office.

In cases where Cordwood is poorly cut for length the correct method of getting the average width of a pile is to measure in inches all the pieces of Cordwood at both ends of the pile that can be accurately measured, also the top tier of pieces for the whole length of the pile, add the inches obtained for each piece and divide the total by the number of pieces measured. The result is the average length of the Cordwood contained in the pile, therefore the average width of the pile, unless a deliberate attempt has been made to mislead the Scaler by manipulation of the Cordwood.

Fuelwood is frequently cut in stove wood lengths, i.e., 12 inches to 16 inches long and occasionally 18 inches long on special orders. Where this "Stove wood" is piled in ricks the same method is applied as in measuring Cordwood and a cord of close piled Stove Wood equals 128 cubic feet. Here again each rick must be carefully measured for width, height and length, whether piled on the ground or loaded in trucks, railroad cars or scows.

Where the Stove Wood is loaded into trucks, railroad cars or scows without being piled in ricks or rows, simply thrown in indiscriminately, then the exact measurement of the contents of the truck, railroad car or scow must be taken, i.e., width, height and length, the cubical contents calculated and reduced to cords by dividing by 200. Two hundred cubic feet of unpiled Stove Wood equals one cord. This is the official basis of charging stumpage and royalty by the Department.

Care should be taken to see that the loads of unpiled Stove Wood is levelled off on top and not run to a peak, in order that the Scaler can get the exact measurements of the load. Bark is included in the measurements and no deduction is made for defects or rotten wood. The operator is responsible for the elimination of rotten wood unsuitable for fuel.

MEMORANDUM

1676805

FROM DISTRICT FORESTER

TO Chief Forester, Vancouver, B.C.

Forest Branch,

VICTORIA, B. C. Sept. 20, 19 43.

LANDS DEPARTMENT
Forest Branch
SEP 21 1943
Your File:
VICTORIA, B.C.

Refer to yours of 0150312 My File: W. Scaling Supervision.

Attention Mr. Marling.

Replying to your memo of September 17th, I discussed this matter at some length with Mr. Allen on his recent visit to Vancouver. I gathered from him and also from discussions with Mr. Simmons of the B. C. Security Commission and Mr. Johnson of the Wartime Prices and Trade Board, Fuel Department, that these projects had been commenced without definite arrangements with the District Forester at Nelson for scaling this material at point of loading, which is the logical place to scale it.

The Fuel Department of the Wartime Prices and Trade Board insisted on an official scale at Vancouver of all carloads delivered and at their request this has been done and copies of all of these scales have been sent to the District Forester at Nelson, also copies have been sent to Victoria. It should be possible to establish the origin of this material by the railroad car numbers on the S & R Accounts issued from this Office, and until a definite system of scaling this material at point of origin is established, I would suggest that you bill stumpage and royalty on these scales.

With reference to the "shrinkage" or more correctly the discrepancies between the estimate or "unofficial" scale made at point of loading and the official scale made in Vancouver; this, in my opinion, is due to many factors, but chiefly to wrong methods of taking measurements and also to lack of care in taking exact measurements. For instance, one carload which I personally measured after it was unloaded and stacked in the fuel yard, averaged only 3feet, 10 inches, in width instead of 4 feet, due to careless measurements of lengths by the cutters.

In order to co-ordinate the work of all concerned in the cutting and measuring of this material, I have issued a Circular covering instructions re Scaling Cordwood and Stove Wood for Fuel, copies of which I am enclosing herewith. Copies of this Circular have been forwarded to the District Forester at Nelson and Kamloops, and to Mr. Charlesworth, also to the B. C. Security Commission and the Fuel Administrator, Wartime Prices and Trade Board. If these instructions are carefully carried out by all parties concerned, there should be no difference between scales made at points of loading and unloading.

Wm. Byers

Wm. Byers,
SUPERVISOR OF SCALERS.

19

Sept. 22, 1943
File: 0150312
Your file: M.Scaling Sup.

District Forester,
N E L S O N.

Dear Sir:

T.J. Prowd.

Reference is made to Stumpage Accounts 25173 and 25174 and S.& R. Accounts 28582 and 28583 billing carload shipments of cordwood cut in the Nelson Forest District for delivery to the B.C. Security Commission, Vancouver.

It is noted that these accounts are issued on the basis of an official scale required by the Fuel Department of the Wartime Prices and Trade Board at Vancouver. Sanction of scale at destination has never been approved by this office and in this connection we enclose copies of correspondence in regard thereto, which is self-explanatory. From the contents thereof you will note that we have offered the Security Commission the choice of two methods of scaling at loading point, to which to date they have made no direct reply. However, until definite arrangements have been made for a scale at point of loading we have no alternative but to accept accounting on the basis of scale at Vancouver and the above numbered accounts are being recorded accordingly.

Mr. Prowd, who is now in the field, may pay a visit to Nelson and if so will you please discuss the whole matter with him in the light of the enclosed correspondence.

You will further note that the Security Commission are of the opinion that the wood will not lose its identity on arriving at Vancouver, however we would question this very much particularly in the case of cars loaded with wood from more than one area and further if and when wood is shipped to Trail and Rossland, etc., as is indicated the question of identity will be further complicated. Under the circumstances it would appear that arrangements should be completed without delay for a scale for billing purposes at loading point and any scale at destination is a matter which concerns the Security Commission and the Wartime Prices and Trade Board only.

Also please find enclosed copy of a statement from the B.C. Security Commission of wood cut and shipped and partly scaled for July and August. The above numbered accounts corresponds with the statement for July shipments from Timber Sales X33442 and X27591. In addition to these July shipments according to the statement 680 cords were also shipped in July on the basis of a scale at loading point, which when scaled at destination amounted

.....P.T.O.

20

to 573.98 cords. According to the statement this cordwood was not marked and therefore it will be necessary for you to determine the area of origin so that accounts may be issued promptly.

Please give these matters your prompt attention.

Yours truly,

Encs.

M. Scaling Supervision

LANDS DEPARTMENT
Forest Branch
SEP 28 1943
VICTORIA, B.C.

Mr. William Byers,
Supervisor of Scalers,
Marine Building,
VANCOUVER, B. C.

Dear Bill:

As agreed upon when I was in Vancouver, I have made a close scale of several cars of cordwood loaded by the Japanese at the different points where loading takes place.

In all fifteen cars were scaled by three licensed scalers and every detail that we could think of has been recorded in order to give as much information as possible as to the number of cords in a car. We intended to get fifteen standard cars and as many cars of other different sizes as possible but due to scarcity of cars and other delays, it was impossible to get this number. However, I think that we have a fair average in the fifteen cars that we have scaled.

The Commission are very much of the opinion that our scaling in Vancouver is much less than what the car contains in cords and they were fully in agreement that we scale up a number of cars in order that a check could be made, if necessary, when the cars were unloaded in Vancouver.

We are giving you the number of these fifteen cars together with the contents and if you think it is advisable you can have these cars checked as they are unloaded in Vancouver and send us your scale as it is our intention, if we can get Victoria to approve of same, to bill up these cars at so many cords per car rather than have each car scaled. This, I mean, is only for our own purposes for stumpage and royalty and would not be taken as a vendor's scale as you are making a vendor's scale in Vancouver.

26

If there is any other information that you require, we would be glad to give it to you and I hope that in making this scale we will be able to get a little closer together on the scale at loading points and your scale in Vancouver.

Youre truly,

R. E. Allen,
District Forester.

M Scaling Sup
CP A.S.W. Sup

Sept.28th, 1943.

Circular Letter to all Rangers and Supervisors
Vancouver Forest District

We enclose Circular Letter "I" 1943 covering proper cordwood and fuelwood scaling procedure. Please read these instructions carefully and follow them exactly when scaling these products.

The A.S.W. are cutting cordwood and fuelwood and it is arranged that each camp foreman will submit returns to the local Ranger semi-monthly segregating the production by area of origin. The Rangers will check each return and forward same promptly to the District Forester.

The above procedure is effective as of this date.

If you have not obtained returns as above, please contact the camp foreman and discuss this matter with him. Instructions will be issued to the camp foremen by the A.S.W. Superintendent but every effort should be made to assist these men to submit their returns correctly and promptly. In this connection, an occasional check scale should be made of A.S.W. production.

Several shipments have already been made to receiving fuel yards but no returns received. Please check and expedite submission of returns in order that billing will not be delayed.

C. J. Haddon

Circular Letter "I" 1943

INSTRUCTIONS RE SCALING CORD WOOD AND STOVE WOOD FOR FUEL.

LANDS DEPARTMENT
Forest Branch
OCT 2 1943
VICTORIA, B.C.

With reference to the scaling of Cordwood for fuel, whether in the round or split, it must be close piled 100% in order to be measured correctly. Close piling means just what the term implies; there must be no undue spaces caused by knots, crooked and unshapely pieces or loose and careless piling; each stick of wood must be snugly fitted into the pile in order to get a correct scale. A cord of wood is 128 cubic feet, i.e., 4 feet wide, 4 feet high and 8 feet long. Cordwood cutters should be supplied with a 4 foot measuring stick with the inches and feet plainly and permanently marked thereon, primarily for measuring the length of the cordwood but which can also be used for measuring the piles. Care should be taken to cut the cordwood the exact length, i.e., 4 feet, other wise the scale is affected if the scaler has to make a reduction on account of a surplus of short lengths contained in the pile. Bark is included in the scale.

There are many conditions under which Cordwood has to be scaled. For instance, it may be piled on the area on which it is cut. Properly piled, this is the ideal place to scale it but at times it may have to be scaled by the truck load on the truck, in railroad cars or on scows. In all cases it must be "close piled" one hundred per cent and each row of cordwood measured for exact length, height and width and the cubical contents of each row computed separately, in order to get the correct scale. Under no circumstances can the gross cubical measurements of a railroad car, or of a scow be taken, as these measurements bear no relation to the amount of Cordwood contained therein. Scaling Cordwood by truck loads is not recommended where it can be avoided as it invariably results in an over scale owing to the large number of measurements required, hence the greater chance of error.

In measuring the height of the piles or rows of Cordwood, measurements should be made at not less than six feet intervals over the whole length of the pile, "the more the better" and the measurements totalled and divided by the number of measurements made to obtain the correct average height of the pile.

Measuring the length of the pile is more simple and easier than measuring the height but great care has to be exercised in this operation also. If the piles are longer than eight feet a 50 foot or 100 foot measuring tape should be used in preference to a scale stick or other measuring stick. The fewer measurements made in obtaining the length of a pile the greater the accuracy. It is customary to "cross pile" the ends of the rows or piles of cordwood to buttress the pile and square the ends, otherwise, without some support the ends would not be perpendicular. In cases where this "cross piling" method is used a deduction must be made to compensate for the "cross piling" as against "close piling". The difference between "cross piling" and "close piling" is approximately fifty per cent in volume, therefore, in cases where both ends of a pile is "cross piled", the length of the row or pile must be reduced by 4 feet. If only one end is "cross piled" and the other end supported by a wall or other perpendicular support, the reduction in the length of the pile would be two feet. The allowance to be made for "cross piling" however, must be left to the Scaler's judgment as this allowance varies under different conditions depending on the size of the pieces and the care taken in piling. This allowance can

be reduced to thirty three and one third per cent by a combination of careful piling and uniform sizes of the pieces.

The only deductions, therefore, which a Scaler is required to make in the measuring of Cordwood is for short lengths, cross piling and loose piling. No deductions must be made for defects of any kind. It is the cutters or operators option to eliminate defective or rotten wood unsuitable for fuel when building the pile.

Cordwood cut longer than 4 feet must be measured for length by the Scaler and recorded accordingly. Scalers measuring Cordwood and making their Official Returns to the Department must use Form FB #72 i.e., Summary of Scale, in duplicate. The width, height and length of each pile must be shown and the computations of the cordage left to the District Office.

In cases where Cordwood is poorly cut for length the correct method of getting the average width of a pile is to measure in inches all the pieces of Cordwood at both ends of the pile that can be accurately measured, also the top tier of pieces for the whole length of the pile, add the inches obtained for each piece and divide the total by the number of pieces measured. The result is the average length of the Cordwood contained in the pile, therefore the average width of the pile, unless a deliberate attempt has been made to mislead the Scaler by manipulation of the Cordwood.

Fuelwood is frequently cut in stove wood lengths, i.e., 12 inches to 16 inches long and occasionally 18 inches long on special orders. Where this "Stove wood" is piled in ricks the same method is applied as in measuring Cordwood and a cord of close piled Stove Wood equals 128 cubic feet. Here again each rick must be carefully measured for width, height and length, whether piled on the ground or loaded in trucks, railroad cars or scows.

Where the Stove Wood is loaded into trucks, railroad cars or scows without being piled in ricks or rows, simply thrown in indiscriminately, then the exact measurement of the contents of the truck, railroad car or scow must be taken, i.e., width, height and length, the cubical contents calculated and reduced to cords by dividing by 200. Two hundred cubic feet of unpiled Stove Wood equals one cord. This is the official basis of charging stumpage and royalty by the Department.

Care should be taken to see that the loads of unpiled Stove Wood is levelled off on top and not run to a peak, in order that the Scaler can get the exact measurements of the load. Bark is included in the measurements and no deduction is made for defects or rotten wood. The operator is responsible for the elimination of rotten wood unsuitable for fuel.

WOOD FUEL CONTROL
Room 623 Vancouver Block
Vancouver, B.C.
September 30, 1943

Mr. M. Gormley
Assistant Forester
B.C. Forest Service
Marine Building
Vancouver, B.C.

Dear Sir:

Concerning our conversation of this afternoon, this is to advise you that the arrangements as outlined in your orders to the Forest Rangers relative to A.S.W. camps advising them that the wood produced under the auspices of the A.S.W. was to be scaled at the camps by the Foreman in charge and checked by a Forest Ranger, are not satisfactory to this Office. The other arrangements suggested by yourselves whereby the scale taken in the City yards be accepted and that any wood left in the bush by ourselves, we mutually agree to accept some satisfactory adjustment.

Not made by us.

Our reasons for not accepting the first mode of scaling are first that any scaling so made would be biased. Secondly our organisation is now set up on the basis of scaling in the City yards which system has turned out satisfactorily to all parties concerned to date, and it would mean considerable reorganisational work on our part.

It is imperative that we receive a prompt decision regarding this matter as we now find ourselves in the position whereby we cannot commit ourselves to truckers and haulers who are handling this wood at the present time, and also to the communities to whom we are delivering this emergency wood.

Yours truly,

C. H. Unicume

MEMORANDUM

1678906

FROM : District Forester, Vancouver, B.C.

TO : Chief Forester, Forest Branch, Victoria, B. C.

October 1st, 1943

Refer to yours of

My File: M Scaling Sup
OP A.S.W. Sup

LANDS DEPARTMENT Forest Branch OCT 2 1943 VICTORIA, B.C.

URGENT

0150312
0379

We attach hereto a letter from the Wood Fuel Control dated the 30th ultimo protesting our scaling and billing system now in effect (see under). This letter resulted from a very vigorous verbal protest by Mr. Unicume and Mr. Johnson of the Wood Fuel Control, that our procedure would seriously interfere with their records and accounting and further (and more vehemently) that they had no confidence in the accuracy of any camp foreman's scale.

After some discussion with the writer, who outlined our requirements, we asked them what they wanted and they, (not at our suggestion as stated in their letter) said that they wanted all of our billing to be on the basis of official scale in the receiving yard and definitely not on the basis of the camp foremen's scale returns.

For your information, we attach hereto a copy of our circular letter of the 28th ultimo which was issued after prior discussion with Mr. Johnson and Mr. Hodgins of A.S.W. Mr. Johnson now states that he did not understand the entire significance of our system of scaling and billing and now objects to it strenuously. He quotes serious shortages in scale between the Nelson District scale and official scale of the same material in the Vancouver Fuel Yard (See prior correspondence with your office on the subject), and anticipates similar discrepancies in A.S.W. material.

The Vancouver scale (official) is made at the Control's request and is to be used for settlement purposes with the Vancouver City authorities. Similar procedure is to govern sale to other community authorities. We proposed to show all material officially scaled in the yards as "charges previously paid" since it would often be difficult, if not impossible, to identify the material by origin when it reached the yards and thus we have been insisting on a camp foreman's scale returns as a basis of settlement of our charges.

This duplicate billing gives rise to the protest mentioned above but, while we do not wish to be considered hidebound on this or any other administrative procedure, (and we so advised the Control), we cannot see our way clear to alter our present scaling and billing procedure without incurring tremendous difficulties. We realize, however, that the duplicate

.....over.

billing (yard billing is only done at the Board's request) will increase their accounting difficulties. Furthermore, another of their sore points lies in the fact that we have received returns from one A.S.W. camp although the wood is pouring into the various fuel yards. However, you will note that our procedure has just recently been effected, although this office has discussed the matter previously with Mr. McKenzies of A.S.W. and his Haney camp has submitted the only return received. In this instance, however, billing was made erroneously on the basis of yard scale and same has not been adjusted pending your decision.

Owing to lack of returns, we have not been able to bill our charges as proposed - nor issue accounts covering the yard scales (except as noted above), since the latter were to show charges previously billed. The Control objects that they cannot pay their haulers and that these men are quitting them at a vital time in getting out the wood before wet weather sets in. Our suggestion of making an advance or paying on copies of yard scale tallies which we provide, is not acceptable to them apparently because of the additional accounting involved.

As a result of our discussions we asked the Control to submit their protest in writing together with any alternative suggestions they had, and we would forward same to you for your earliest consideration.

We are not committed to change our policy in this matter in any way, and we have so advised Mr. Unicume, also explaining that Mr. Hodgins would probably be consulted before a final decision was reached. Mr. Unicume & Mr. Johnson both threatenad that their Board would remove the A.S.W. men from B. C. if further difficulties were placed in the way of their fuel production efforts. Such power was news to us but we were assured by these gentlemen that this was the case (?) We assured them that we were sympathetic and realized that they were working under difficulties, but requested that they also realize our situation.

M. W. Gormely
ASSISTANT FORESTER

Files: 0150312
0379

Wood Fuel Control,
Dept. of Munitions & Supply,
Room 623, Vancouver Block,
Vancouver, B. C.

Attention Mr. C. H. Unicume,
Asst. Regional Wood Fuel Officer.

Dear Sirs:

This will confirm our understanding reached at Vancouver on October 8th last and constitute a reply to your letter of September 30th to Mr. M. Gormely of our Vancouver office.

As I advised you, we will have Acting Official Scalers appointed at each A.S.W. camp producing fuel wood for you. They will be fully instructed and checked periodically. All 4-foot wood will be scaled in the piles on the area where made and all stove wood lengths scaled as hauled from the area, using 200 cubic feet of loose piled wood per cord.

Operations by private parties will have to be handled similarly, except where there is no chance of mixing wood from different areas before reaching destination. In the latter case, we shall be satisfied to take the official scale at destination and bill accordingly.

Arrangements to this effect will be made by the District Forester, who will bill you stumpage and/or royalty on all counts.

All wood arriving at your Vancouver and Victoria yards will be scaled officially for your information and will be for quantity only.

34

Needless to say, the scale in the woods is subject to your own check if you so wish, and we shall be glad to discuss any discrepancies that may occur, in a spirit of give and take.

Arrangements for scaling the wood cut by the B.C. Security Commission for stumpage and royalty are being made with them. An official scale at receiving yards will still be made for your information.

Yours truly,

GPM/PC

Geo. P. Melrose,
Asst. Chief Forester.

Encs.

36

October 14, 1943.

File: 0150512.

B.C. Security Commission,
360 Homer Street,
Vancouver, B.C.

Attention Mr. Eastwood

Dear Sir:

In connection with our conversation of last Friday concerning the scaling of wood being produced at your camps for the Wood Fuel Control, I wish to confirm the arrangement made that the District Foresters concerned, namely those at Vancouver and Nelson would be instructed to make arrangements satisfactory to your people and ourselves for the local scaling of the wood. This is necessary because of the various classes of land and rates of stumpage and Royalty made necessary thereby. It will not be possible to have the scaling done for stumpage and Royalty charges at Vancouver because of the impossibility to maintain identity.

In this connection it will be necessary to appoint an acting licensed or official scaler at your camps. If you have not sufficient employees at present to take on this work, it will be necessary to employ someone. This can best be determined by the men on the job.

We will continue making an official scale at Vancouver for purposes of settlement between you and the Wood Fuel Control which depends entirely, I understand, on the quantity regardless of area of region.

Will you please notify your local men in this connection so that all arrangements can be made very shortly. In the meantime it will be necessary for them to work out an adjustment between what has already been shipped without local scaling and come to a point where the new system starts. This again had better be worked out on a local basis.

Yours truly,

Geo. P. Melrose,
Asst. Chief Forester.

39

RSR B.C. Security Commission
M. Scaling Supervision

Enclosed herewith please find copy of our letter to the Wood Fuel Control, Department of Munitions & Supply, Vancouver, B.C., also copy of our letter of the 14th instant to the B.C. Security Commission dealing with the Department's requirements in reference to the scaling of fuelwood delivered, for accounting purposes.

You are more particularly concerned with the B.C. Security Commission and request is made that you get in touch with the local officials with regard to the immediate appointment of a licensed scaler at production points as discussed in our previous correspondence.

We are given to understand that the situation is liable to be further complicated by the establishment of slasher mills installed to cut into four-foot lengths timber skidded to the millsites and oftentimes involving various areas. An equitable method of scaling this material for revenue purposes will have to be worked out by you and the local officials of the Security Commission since the four-foot wood sawn and split may, in many cases, have lost its identity and be mixed after passing through the mill.

Your earliest possible attention should be given to this matter as considerable shipments have already taken place without local scaling apparently and we do not wish a further accumulation to be adjusted on the basis of the last paragraph of Mr. Melrose's letter.

Please advise promptly when arrangements have been completed with reference to this entire matter of scaling for our stumpage and/or royalty accounts.

VICTORIA, B.C.

Mr. G.P. Melrose,
Assistant Chief Forester,
Department of Lands,
VICTORIA, B.C.

Dear Sir,

We wish to acknowledge your letter of October 14th, having to do with the scaling of fuelwood produced in Japanese camps in the interior of British Columbia. We presume that you are having a survey made, by your Department, of the many problems that present themselves in each of the shows which we are operating at Kaslo, New Denver, Slocan and Tashme, B.C.

We understand that this Commission will provide an official scaler who will be in the employ of the Security Commission, yet who will be licensed by your Department as an official scaler. We understand that Mr. Clarkson, our Assistant Supervisor at Kaslo, has already been approved by your Nelson office, and men will therefore have to be provided at the three other points. This will be given consideration immediately.

We will work through Mr. Allen at Nelson and Mr. Livingstone, the Selective Service officer at that point, to procure the necessary personnel for Slocan and New Denver. We believe we have a man at Tashme who could take on this additional work.

We assume that when reports come into your office from Mr. Allen, covering the three interior projects, and from your representative whom you are sending into Tashme, that we will be permitted to discuss the general situation with you to decide how best to handle each project in view of its peculiar diversifications. There are no two operations working alike, and until the complete picture is before you it will be very difficult for you to make a decision.

Until we hear from you therefore, and have a chance of discussing the situation, there is very little we can do other than prepare ourselves with personnel who can do the scaling and have them in readiness to take instructions.

Yours truly,

BRITISH COLUMBIA SECURITY COMMISSION

ATTENTION: Management

With reference to your letter of the 14th instant, Ranger Pym has now submitted a report on the cordwood being produced for the Mount Baker Forest Products Limited.

This Company is buying slabwood from Mr. L.G. Mattice who is obtaining the slabs from T.L.11165p.

Shipping permits were requested for the shipment of cordwood from the above mentioned licence. Not realizing that the wood was slabs, royalty at the rate of 35¢ per cord was collected by Pym. In checking on the status of the licence Pym was advised that the area was in arrears from September of this year and pending the reinstatement of the licence the above mentioned collections are being retained. Would you therefore check the status of T.L. 11165p and advise. In the event the licence is still in arrears your advice on the collections to be made would be appreciated.

If the licence is in good standing we will have no charges to collect on the slabwood and it would therefore appear that the Mount Baker Forest Products Limited are not entitled to any additional subsidy from the Wood Fuel Controller.

W. C. Phillips,
Assistant Forester.

Attention - Mr. C.H. Unieume

Dear Sir:

Reference is made to your letter of the 9th instant with reference to royalty collected from the Mount Baker Forest Products, Limited, at the rate of 35¢ per cord on slabwood.

We are now in receipt of a report from the District Forester at Nelson who advises that this slabwood comes from Timber Licence 11165P, which is paid up to September 16, 1944, and therefore it may be removed free of royalty so long as the licence is in good standing. Under the circumstances we are advising the District Forester at Nelson to refund to the Mount Baker Forest Products any monies collected on account of royalty.

We would, however, like to point out that any fuelwood or cordwood other than slabwood cut and removed from the licence would be subject to the usual royalty, namely 35¢ per cord.

As requested we are returning herewith receipts issued to the Mount Baker Forest Products, Limited, for royalty already paid.

Attention: Chief Forester

Dear Sir,

We have today received your receipt, #10665A, dated October 15th. Just in case it is of any particular importance we wish to draw your attention to the breakdown of scaling fees and timber royalty. Your receipt shows $83.31 for scaling and $21.27 for Royalty. We make these figures: scaling $76.96 and royalty $27.62.

Yours truly,

MEMORANDUM

TO Chief Forester,
[redacted]VICTORIA, B. C.

Refer to yours of

FROM DISTRICT FORESTER
NELSON B.C.
November 25th 1943
Your File: 1690740
My File: RSP/B. C. Security Commission

ONS0312

FOREST SERVICE DEPARTMENT
Forest Branch
NOV 29 1943
VICTORIA, B.C.

ATTENTION: Management

In connection with the various cordwood operations of the B. C. Security Commission within our district we will shortly have the billing completed on all the cordwood shipped to Vancouver and other points for the Wood Fuel Control Board. We also have on hand returns for cordwood supplied to their various camps for their own use. When the Japanese were first brought into the country we arranged for the use of a number of free use areas from which they could obtain local cordwood needs. This year they have been operating on a commercial basis supplying the better wood for the Fuel Board with the *cull material and undesirable species for their local needs. It would seem that we should bill up all cordwood cut from the private areas and put the onus on them to contact your office if any refunds are in order. As the matter stands at present we have no authority to waive any stumpage and/or royalty and it would seem the matter should be handled similar to the manner in which the Departmental charges were collected along the Alaska Highway. Please advise.

* short lengths + poorer material is a better classification W.C.P.

WCP:SH

W. C. Phillips,
Assistant Forester.

69

NELSON

DEC. 1, 1943

5th ultimo

RSR B.C. Security
Commission

You state in your letter you have on hand returns for cordwood supplied to the various Japanese camps for their own use and reading the remainder of your letter we assume that none of these returns covers any cordwood secured from free use permit areas previously granted. This, therefore, would confine the returns for camp use to wood secured from privately purchased stumpage, that is from Crown grants or from timber sale areas, the better quality of which was disposed of to the Fuel Control Board.

Based on the above assumptions we can see no other course to follow than to bill stumpage and/or royalty on all returns for wood used in the camps (this presupposes that the returns designate the origin of the material). We would then be in a position to consider any claims for rebate submitted by the Security Commission containing full particulars as to the origin of the material on which the rebate was claimed.

Please proceed in line with the above.

Mr. R.E.Allen,
District Forester.
NELSON, B.C.

LANDS DEPARTMENT
Forest Branch
JAN 6 1944
VICTORIA, B.C.

Dear Sir:

Re: S. & R. ACCOUNTS NOS. 29302/3/4

We are in receipt of the above covering "Wood supplied to various Japanese Camps" from timber sales at Slocan, Lemon Creek and New Denver.

We wish to point out that our understanding with your Mr. Melrose of Victoria was to the effect that no stumpage and royalty would be charged by the Forestry Department on wood taken from timber sales for use in our Japanese relocation camps. We would therefore appreciate your arranging to have the account in question, and any similar accounts, cancelled.

We would also like to point out that the wood taken into the camps is the reject cordwood which was not suitable for shipping to the Wood Fuel Controller, and that it is a type of wood which would ordinarily be burnt in the woods in cleaning up after a logging operation. It is definitely not marketable material.

Yours truly,

BRITISH COLUMBIA SECURITY COMMISSION

"W.A. Eastwood"

Attention Management

In connection with our recent billing of cordwood cut for the Japanese camps in Slocan Valley we are forwarding herewith copy of a letter received from the British Columbia Security Commission. In this connection we would ask that you refer to your letter of the 1st ultimo on the above file.

With a probability that the accounts for local wood might be cancelled we billed such wood on separate accounts. However it is our understanding that all wood supplied to the Japanese is sold to them at a nominal price by the Commission and we therefore feel that our charges on private areas should stand as is.

When replying to the Commission's letter would you please forward a copy for our information.

W.C. Phillips,
Assistant Forester.

Attention - Mr. W.A. Eastwood

Dear Sir:

Re: S.& R. Accounts 29302/3/4 with
Corresponding Stumpage Accounts
25830 and 25831

Your letter of the 29th ultimo addressed to District Forester Allen at Nelson has been referred to this office for attention.

The writer has no recollection of the understanding to which you refer in regard to payment of stumpage and royalty to this Department on wood taken from timber sales for use in Japanese relocation camps. There must be some misunderstanding in this connection and you probably have reference to material used in logging improvements or camp construction on areas being operated, in which case it is not the policy of the Department to make any charge for other than sawn material.

You will quite understand our inability to accept your suggestion that the accounts above mentioned be cancelled inasmuch as the material covered involves a number of Crown granted areas and other areas upon which cutting rights have been acquired subject to the payment of specified sums by way of stumpage and/or royalty. Undoubtedly cutting rights granted to your Commission involved certain payments to the private owners, which throws all your operations on such lands in the category of commercial operations. At the same time, doubtless you made due provision in your cutting agreements for the payment of any Government dues either direct by the individual owners or through deduction on payment made for the timber.

P.T.O.

87

Under the circumstances, therefore, we are obliged to ask that you put through the accounts already issued and any subsequent accounts of like nature in line for payment.

Yours truly,

Geo. P. Melrose

Your File: 0145857

My File: RSR Dept. of Munitions & Supply.

1696593

Attention Mr. S.W. Barclay.

As you no doubt are aware the Department of Munitions and Supply, Wood Fuel Controller, is operating a Woodyard on a large scale on the False Creek Flats, Vancouver.

We have an Acting Official Scaler appointed who scales all wood going into the Yard either by rail or by truck and it is our practice to bill our charges on all such material to the Wood Fuel Controller.

A difficulty has recently arisen in connection with a party by the name of T.L. Black, who operates on the British Pacifi c Properties at West Vancouver and was formerly delivering to the West Vancouver Municipality but is now starting to deliver by truck to the Wood Fuel Controller. We have experienced some considerable difficulty in collecting our accounts from this man and your office will recollect that quite recently we received from him a cheque which was not honoured by the Bank upon presentation, payment being subsequently made by the West Vancouver Municipality in order to protect their interests.

Mr. Black on several occasions has requested that we bill him direct for all material which he is delivering to the Wood Fuel Controller and that he be allowed to make settlement for same on a semi-monthly basis. This we have refused to do advising him that our charges on all material going into the False Creek Yard will be billed against the Fuel Controller but he will receive a copy of the scale bill and if he wishes to make settlement of the charges on material which he has delivered he can do so and we will furnish him with a copy of the receipted account or with a clearance for the Wood Fuel Controller's office.

We have also had several conferences with officials of the Wood Fuel Controller's office who advise us that they cannot, under instructions from Ottawa, pay any of our charges outside of scaling fees as their contracts with the various operators call for the wood to be delivered into their Yards free of Government charges, consequently they have informed us they will not pay any charges which we may bill outside of scaling fees.

Matters have been brought to a head by the receipt of a cheque from the Wood Fuel Controller for $258.32 which

(over)

90

we are forwarding to you under separate cover, which cheque includes the scaling fees of $2.44 under S & R Account #313692 and they have deducted the royalty of $12.18.

While we are anticipating that we shall be able to collect the said royalty from Mr. Black, the fact remains that the Wood Fuel Controller, under instructions from Ottawa, is taking an arbitrary stand by refusing t o recognize Departmental charges on wood which he is receiving and there is every possibility that cases will arise where we will be unable to effect collection from one or more of these fly-by-night wood cutters, and we are therefore placing the matter before you, and we would request your definite instructions as to the action to take.

S.R. Fox
Chief Clerk.

Vancouver, B.C. January 12, 1944

RSR Dept. of Munitions & Supply

Attention Mr. E. P. Fox

Your letter of the 28th ultimo is received.

We would request that you draw the Wood Fuel Controller's attention to the provisions of subsection 1 of section 146 of the "Forest Act." The Department of Munitions & Supply is dealing in timber upon which royalty is payable to the Department, and therefore the said Department and the vendor are jointly and severally liable to pay to the Minister monthly all such sums of money as are shown to be due. Also the provisions of section 144 are applicable, as in the event of non-payment of our charges, action may be taken by this Department in accordance therewith. We note the Wood Fuel Controller purchases the wood delivered into their yards free of Government charges, and therefore that does not prevent the said Department deducting royalty charges in their settlement with the vendor and paying the amount deducted to this Department. We have always received the closest co-operation from other Dominion Government Departments, and there would appear to be no good reason why the Department of Munitions & Supply should be an exception. Please inform the Wood Fuel Controller that for the past fourteen years we have been administering the cutting of timber on a Dominion timber block in the East Kootenay District, and collecting stumpage in accordance with the permits issued by the Department of the Interior at Ottawa, and paying all such moneys over to the said Department. Under such circumstances, without even taking into consideration the above mentioned statutory provisions, it would seem only reasonable that another Department of the Federal Government would reciprocate by complying with our request.

We would request that these matters be discussed with the Wood Fuel Controller, and please advise in regard to the arrangement entered into with him.

S.W.B.

MEMORANDUM

TO Chief Forester

Forest Branch

[redacted] Victoria, B. C.

Refer to yours of

FROM DISTRICT FORESTER

Vancouver B.C.

1698484 January 8th 19 44

Your File:

My File: RSR Dept. of Munitions & Supply

LANDS DEPARTMENT
Forest Branch
JAN 10 1944
VICTORIA, B.C.

Attention Mr. S. W. Barclay.

Referring to our memorandum of the 28th of December last in respect to our accounts against the Department of Munitions and Supply (Wood Fuel Controller.)

We now enclose herewith a copy of a memorandum today received from the Wood Fuel Controller together with the statement which was enclosed therein and a cheque for $107.29.

You will note that in respect to S & R Accounts numbers 314074, 314075 and 314527 that the Wood Fuel Controller is paying the scaling fees only and has deducted the following accounts for royalty:

S&R 314074	$1.76
314075	7.14
314527	4.20

together with the balance of $12.18 under S & R Account #313692.

With respect to royalty charges on wood delivered to the Wood Fuel Controller as billed under S & R Accounts numbers 314075, 314527 and 313692 (today cancelled by S & R Account #314965) please be advised that Mr. Black has requested us to apply the amount of $13.27 in settlement of these charges out of a credit of $40.88 which results from the issuance today of S & R Accounts numbers 314955 to 314964 inclusive.

With respect to S & R Account #314074, however, this is a different matter as McFadden has not paid the royalty of $1.76 and the fact that the Wood Fuel Controller is deducting this am ount and refusing to pay same will lead to complications and we are therefore laying the matter before you again before dealing with the enclosed cheque.

If you decide to accept the cheque will you kindly return same with your instructions to this office in order tha t we may prepare the usual advice slip and make the necessary entries in our ledger and at the same time receipt

January 11th, 1944.

Department of Lands,
Forest Branch,
VICTORIA, B. C.

Attention Mr. Geo. P. Melrose, Asst. Chief Forester

Dear Sir: Reference: Your File 0150312

We wish to acknowledge your letter of January 7th in connection with stumpage and royalty charges on fuel wood cut on lands tributary to our Japanese Interior Housings and used by this Commission for domestic heating purposes in our Japanese settlements.

There seems to be some misunderstanding, Mr. Melrose, in our interpretation of your policy in respect to the above-mentioned charges. We have been operating these last eighteen months on what we feel was a definite understanding with your Department that there would be no stumpage and royalty on the type of fuel wood that was being taken off these properties.

As you no doubt know, a very high percentage of all the merchantable logs taken off these properties tributary to our Tashme Project were passed through our lumber mill at Tashme and were accounted for through the product of that mill and the only fuel wood was the poorer quality of bushwood that had no value commercially.

In the interior of British Columbia, in the Kootenays, we only took wood for fuel wood purposes that was approved by your

97

1699039

Nelson Branch and in both the Hope and the Nelson area we were firmly of the opinion that there would be stumpage and royalty charges for our domestic fuel wood requirements. Of course, this last summer when we entered on a fuel wood cutting programme for the Department of Munitions and Supply, Fuel Wood Branch, and when this wood was being shipped out to Vancouver and many other points in the Province to fill an economic need we knew that there would be a stumpage and royalty charge and have set this charge up in our Accounting.

In view of these misunderstandings and as we are of the opinion that your new decision involves a considerable amount of money, we feel that we should have a discussion on the matter. Is it possible that you are coming over to Vancouver in the very near future? If so, we would like to make an appointment with you and discuss the whole situation with you at that time.

Yours truly,

W. A. EASTWOOD

Attention Mr. E. P. Fox

Your letter of the 14th instant is received.

We propose to take to account the cheque in the sum of $107.29 received from the Wood Fuel Control - Department of Munitions & Supply, although such action will not release the said Department of their liability for the payment of royalty on all timber cut for or received by them as provided under the provisions of subsection 1 of section 146 of the "Forest Act." We are glad to note that Mr. Haddon proposes to discuss with the Wood Fuel Controller the matters dealt with in my letter of January 12th, 1944, and no doubt an arrangement satisfactory to all parties will result therefrom.

JAN 18 1944
VICTORIA, B.C.

Attention Mr. S. W. Barclay.

Referring to your memoranda of the 12th and 15th instant please be advised that the District Forester in company with myself called upon the Wood Fuel Controller this morning and discussed with him the matter of our charges against his Department.

After a discussion between the Wood Fuel Controller, his Accountant, and an Official from the Accounting Department at Ottawa, who happened to be present, it was decided that in future they would withhold from the various parties supplying them with wood, the sum of $1.00 per cord until such time as the operators had furnished their office with satisfactory proof of payment of our charges, or a certificate that we had no charges on the wood delivered.

E. P. Fox
Chief Clerk.

VICTORIA, B.C.

Attention Mr. S. W. Barclay.

Referring to your memorandum of the 15th instant in which you advised that the cheque for $107.29 received from the Wood Fuel Controller was to be taken to account. Please be advised that up to the time of writing we have not received the usual advice from your office of the application of this cheque nor has the statement in triplicate been returned to the Wood Fuel Controller.

In the above connection we forwarded to you yesterday a further cheque from the Wood Fuel Controller for $296.97 covering charges for the period January 1st to January 15th and the Wood Fuel Controller has telephoned asking for the return of the statement which accompanied his first cheque, in order that he may obtain reimbursement from Ottawa.

If you do not have a temporary receipt stamp such as is used in this office perhaps you would return the statement in triplicate to this office together with the advice so that we may stamp same and return to the Wood Fuel Controller as required.

Your kind attention to this matter is requested as the Wood Fuel Controller's office requires the receipted statement to forward to Ottawa immediately.

E. P. Fox
Chief Clerk.

EPF/sd.

Attention Inspector
Re statements

Dear Sir:

On January 7th, we mailed our cheque #149 in the amount of $107.29, to your Vancouver office, with three copies of your statement attached. We asked them to kindly receipt and return the three attached statements to us immediately. On talking to your Mr. Fox today, asking him for these receipts, he advises that the cheque and triplicate statements were mailed to you.

Since we are now almost at the end of January, and we must have these triplicate receipts to mail to Ottawa at the end of this month, will you be kind enough to see that these are mailed to us by return, along with your official receipt? We shall appreciate your prompt attention to this matter so that we may get these vouchers to Ottawa along with the cancelled cheque.

Yours very truly,

T. H. Flinn,
Regional Accountant.

Dear Sir: Re: Lemon Creek Japanese Camp

We are in receipt of your S & R account #29623 of January 27th in the amount of $491.75 to cover wood used in our camp and cut from Timber Sale Lot Nos. #945 and #947.

We would point out that Lot #8945 has been purchased by this Commission and the title for same has been registered in the name of His Majesty the King - Certificate #55877-1.

According to our understanding of your Act, as applied to this Commission, we are not to be charged stumpage or royalty on wood used in our own camp and taken from properties registered in our name. We would, therefore, ask that you issue an amended account in this connection, cancelling the charges on the cord wood from Lot #8945.

Yours truly,

Vancouver, B.C.

February 29th, 1944

LANDS DEPARTMENT Forest Branch MAR 1 1944 VICTORIA, B.C.

Refer to yours of

My File: MPI B.C. Security Comission

Attention - Management

The B. C. Security Comission has been cutting timber on rights-of-way through various parcels of privately held land in the vicinity of Tashme on the Hope-Princeton highway, and the material has been used for fuel purposes at their camp. This office has billed our charges on the said material depending upon the status of the lands on the assumption that a commercial agreement had been entered into with the owners of the said property for the use of the timber thereon.

Upon receipt of a protest from the B.C. Security Comission in respect to our charges, we investigated and find that the majority of the said material was cut on the Hope-Princeton highway right-of-way under the direction of the Department of Mines and Resources of Canada, and the material used for camp fuel only, by the B.C. Security Comission, and that no commercial transactions appear to have been involved. The majority of the alienated land belongs to the owner of 14-Mile Ranch, which was completely taken over by the B. C. Security Commission, who regard the timber as their own and protest having to pay royalty on it when used for their own purposes.

Roy J. R.G. B.C. Int'rgnl. Mines.

S&R Accts. 315741, 315742, 315753, 315789, 315790, 315791 and 315793 cover accounts issued for the material in question.

In this particular instance there is some doubt in our minds as to whether billing of royalty in this case was justified and we would request your decision in the matter at your early convenience.

M. W. Gormely

March 2, 1944
File: ~~0146731~~ 0130312
Your file: MTI B.C.
Security Commission

District Forester
VANCOUVER

Dear Sir:

Please refer to yours of the 29th ultimo.

The following is a general outline of policy regarding stumpage and/or royalty charges on timber cut by the B.C. Security Commission.

1. Timber cut for the Department of Mines and Resources for use in road construction and maintenance:

The Department of Mines and Resources is viewed in the same light as the Public Works Department in connection with road construction and maintenance, hence all timber used for this purpose is treated in the same manner as that used by the Public Works Department. This means that all timber supplied by the B.C. Security Commission to the Department of Mines and Resources for road building purposes, also fuel used in the camps of the B.C. Security Commission, is free of royalty when cut on public road rights-of-way. Thus fuelwood secured for the Tashme Camp from the Hope-Princeton Highway right-of-way is not subject to charge.

2. Cordwood fuel for the B.C. Security Commission camp use from B.C. Security Commission lands:

All camp cordwood fuel secured from lands, title to which is registered in the name of His Majesty the King in the right of the Security Commission, is free of royalty, being subject to free use as in the case of all Crown grantees using cordwood from their properties for domestic fuel purposes. (As a matter of fact we do not issue the actual free use permits.)

In the case of timber sales taken out in the name of the Commission we are prepared to view camp use of unsawn timber in the same manner as unmanufactured material used in logging improvements and forego stumpage and royalty.

3. Timber cut on alienated lands and used for camp purposes, including road rights-of-way acquired for private use:

Royalty is properly chargeable according to status of the land in all such cases unless title is registered as in (2).

.....2

120

Timber secured from other timber sale licencees is also subject to stumpage and royalty.

Thus cordwood for camp use from the 14-Mile Ranch is properly chargeable unless title is registered as in (2).

4. Commercial sale of timber:

All timber cut and disposed of by the Commission through commercial channels is subject to stumpage and/or royalty as is indicated by status.

5.. Free-use areas:

Specific areas are set aside for the B.C. Security Commission covering free use for camp purposes as per established Departmental policy.

With the above points in mind you may be in a position to make any necessary adjustments in the accounts enumerated in your letter.

Yours truly,

Geo. P. Melrose

LANDS DEPARTMENT
Forest Branch
MAR 8 1944
VICTORIA, B.C.

Attention Mr. Simmons

Dear Sirs:

Further to recent discussions between the writer and your officials at Tashme, we have to advise that the following is the general outline of Forest Service policy regarding stumpage and/or royalty charges on timber cut by the B. C. Security Commission:

(1) Timber cut for the Department of Mines and Resources:

In respect to timber used for road construction and maintenance by the Department of Mines and Resources or the Provincial Public Works Department and supplied by the B. C. Security Commission, such is free of royalty when cut on public road rights-of-way. This also applies to fuel wood secured for the Tashme camp from the Hope-Princeton Highway right-of-way.

(2) Cordwood for the B.C. Security Commission camp use from B. C. Security Commission lands:

All camp cordwood and fuel wood secured from lands, title of which is registered in the name of His Majesty the King in the Right of the B. C. Security Commission is free of royalty, being subject to free use as in the case of all Crown grantees using cordwood from their properties for domestic fuel purposes.

In the case of timber sales taken out in the name of the Commission, we are prepared to forego stumpage and royalty on unsawn timber used for camp purposes.

(3) Timber cut on alienated lands and used for camp purposes including road rights-of-way for private use:

Royalty is properly chargeable according to the status of the land on all such cases unless the title is

....over....

124

registered as in (2) above.

Timber secured from other timber sale licencees is subject to stumpage and royalty.

(4) Commercial sale of timber:

All timber cut and disposed of by the Commission through commercial channels is subject to stumpage and/or royalty as indicated by the status.

(5) Free-use areas:

Specific areas have been set aside for the B. C. Security Commission covering free-use for camp purposes as per established Departmental policy, (see B. C. Security Commission permits 1, 2 and 3).

In line with the above, the various scale and royalty accounts under review will be amended where applicable. Detailed advice will be submitted when the said accounts have been adjusted.

Yours truly,

C. J. Haddon

MEMORANDUM

LANDS DEPARTMENT Forest Branch APR 24 1944 VICTORIA, B.C.

DISTRICT FORESTER 1720083

TO Chief Forester, VICTORIA, B. C.

NELSON B.C.

April 21st 1944

Refer to yours of

Your File: 0150312

My File: RSR/B. C. Security Commission

ATTENTION: Management

Please refer to S. & R. a/c #30287. The first two billings on this account have been questioned by Mr. D. W. Simmons from the Vancouver office of the B. C. Security Commission. If it is your intention to have the advice contained in your letter of the 4th ultimo considered retroactive it would seem that the charges to T.S.X33442 and X34237 should be cancelled by way of the issue of a journal voucher. The sales are registered in their name.

Ok. M

With regard to T.S.X27591 we would point out that this sale was transferred to the B. C. Security Commission about September 27th, 1943. Since this date 604 cords were scaled and included in the quantity of 1336 cords. If it is in order to cancel the charges on this quantity would you please have same included in a journal voucher or advise if this is not possible.

Ok M.

With reference to S.& R. a/c #30289 the Security Commission have questioned the billing to Lot 8947. In their advice they point out that their application to acquire the title to this lot was made on March 3rd, 1944, and the title was registered on March 16th. We would recommend that this office be given authority to advise the Commission that wood cut for their own use from the said lot will be considered exempt of Departmental charges on and after April 1st, 1944. Please advise.

Ok. March 3. M. ?

Incidentally, since authority was given to waive Department charges on areas acquired by the Commission we understand it is their intention to acquire full rights to all areas on which they propose to cut cordwood to avoid paying royalty charges.

W. C. Phillips

W. C. Phillips,
Assistant Forester.

WCP:SH

N E L S O N

145

APRIL 27,1944

21st instant

RSR B.C. Security Commission

With reference to S. & R. Account #30287 it is approved that the first two items may be cancelled by way of Journal-Voucher. This approval is based on the assumption that the B.C. Security Commission might have secured under free use arrangement their cordwood supplies for Japanese housing communities by means of the mutual agreement between the Province and the Federal Government. Strictly speaking, Section 2 of our letter of March 2nd outlining the whole policy could be interpreted to confine the free use of unmanufactured material from timber sales to that actually used in logging improvements (by "logging improvements" we mean the actual camps housing the loggers not the general Japanese community located elsewhere). It is admitted, however, that in the Japanese housing programme it is more difficult to differentiate between the general community housing plan and the actual camps set up for logging purposes only.

In regard to Timber Sale X27591 it is noted this contract was transferred to the B.C. Security Commission by the Deputy Minister's approval dated the 27th September, 1943, and consequently any cordwood cut on this timber sale area used for Japanese housing purposes may also be considered free of charges as in the above instance. We are, therefore, approving a Journal-Voucher for 604 cords as stated in your letter scaled after September 27, 1943.

In regard to S.& R. Account #30289 we will accept the Security Commission advice that their application to acquire title to Lot 8947 was filed on March 3, 1944, and the title registered on March 16th. Under these circumstances we are prepared to consider any cordwood cut from this lot on and after March 3, 1944, as exempt from royalty. You are, therefore, authorized to cancel and replace S.& R. Account #30289 in line with this approval. It will be necessary for you to determine what proportion of the 2,509 cords involved was cut prior to March 3, 1944, and issued royalty account for this volume.

Our Accounts Office is being asked to issue the Journal-Vouchers as indicated and we will await the account cancelling and replacing #30289.

ATTENTION: Management

The contents of your letter of the 27th ultimo have been noted and S.& R. a/c #30289 will be cancelled and replaced when we have determined the quantity of cordwood cut prior to March 3rd, 1944.

The Security Commission have now pointed out that on S.& R. a/c #29623 we have billed 498 cords of wood cut from Lot 8945 during November and December. In their advice the Commission point out that the application for registration of this lot was filed on October 5th, 1943, and the Certificate of Indefeasible Title # 55877-I was issued on October 16th, 1943. In line with our other action it would seem that a journal voucher should be issued cancelling the royalty charges on 489 cords.

MTI B.C. Security Commission

Paragraph 4, page 2, of our letter of March 2, 1944, deals with charges on timber cut and sold by the B.C. Security Commission, the rate of stumpage and royalty being governed by status.

Referring to timber cut from the right-of-way of the Hope-Princeton Highway or any other public road, royalty is due the Crown and stumpage, if any, may be payable to the Public Works Department as they deem advisable. This applies whether the timber is sold by the Public Works to a purchaser or whether the timber is being removed by contract.

In this particular case, it seems likely that the B.C. Security Commission has received authority to cut and remove this timber from the Public Works Department and are probably being given the timber free of stumpage for the removal of same.

District Forester,
Kamloops, B.C.

Dear Sir:

We are enclosing copy of a letter dated October 11th, 1944 from Mrs. A. Uitti of Craigellachie, B.C., offering the sum of $10.00 for a small quantity of firewood from an area cleared as F.U.P.7368 in the vicinity of Taft by Japanese on the Revelstoke-Sicamous Project under the jurisdiction of the Dominion Department of Mines and Resources.

Will you please have the ranger contact Mrs. Uitti with a view of consummating a cash sale of this material at ~~prevailing~~ prices above and forward all moneys direct to this office when further instructions will be issued.

Yours truly,

Geo. P. Melrose,
Asst. Chief Forester.
