REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 3 - February 13th, 1942

The Naval Service is working diligently on salvage and re-mooring. It is now determined that 162 boats have been sunk. Practically all have been raised and are in shipyard hands for re-conditioning, or they are being prepared for passage to shipyards.

Sales negotiations are still retarded by the necessity of withholding inspection passes. Naval Services expect to have the mooring well in hand within one week, when inspection passes will be freely issued.

In the meantime, the committee's office is continuing to encourage the initial steps in sales negotiations between Japanese owners and fishermen who desire to buy vessels. A total of only 17 boats have been actually sold up to date. In addition 20 vessels have been released from immobilization after the committee verified that ownership was vested with eligible fishermen. These boats had been impounded by reason of being manned by Japanese crews.

A statement showing the general position of impounded vessels is attached hereto, and will be included in the weekly letter in future.

The committee is working in close collaboration with the Chief Inspector of Fisheries and with the Custodian of Alien Enemy Property, and is receiving satisfactory support from these two sources.

Source: Nikkei National Museum, 2010-4-4-2-1-1
www.nikkeimuseum.org

Active negotiations are being carried out with the larger fishing companies, with a view to accelerating the transfer of title in the large number of fishing vessels in which they have a financial interest, and the outlook appears to be favorable towards considerable progress in this regard as inspection of vessels can be made with greater facility.

We have now received detailed instructions from the Chief Treasury Office of the Department, in so far as the accounting standards and reports required are concerned; and, with a view to bringing records in line with these requirements as rapidly as possible, we are receiving the co-operation of the accounting staff of the Inspector of Fisheries.

A. E. McMaster,
Executive Assistant.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 6 - March 6, 1942

There were twenty-one vessels sold during the week under review, and in addition, 38 vessels were released to registered owners, after our office had verified ship registers and licences. In all, 165 vessels have been released to date, or about 16 per cent of the vessels now recorded with the Committee.

The fleet is now well moored, and all damaged vessels either repaired or in hand. Hourly ferry service is operating, and interested purchasers, not exceeding 80 in number, can be shown around the fleet each day. The following comparisons of passes issued and the number of persons inspecting boats indicate the increase in inspections:

	No. Passes	No. People
Up to and including Feb. 12	20	43
Week ending Feb. 19	21	52
" " Feb. 26	92	165
" " Mar. 5	122	258

These increased inspections have not yet reflected themselves in actual sales, but they should do so within the next few weeks.

Purchases by the larger fishing companies have been somewhat disappointing as yet. This is claimed to be due to differences in ideas of values; and in order to correct the situation your Committee is urging the parties to utilize the arbitration machinery available. It is the opinion of your Committee that settlement of a few of these cases would accomplish an acceleration of sales.

Source: Nikkei National Museum, 2010-4-4-2-2-1
www.nikkeimuseum.org

The Custodian of Alien Enemy Property advertised the vessels he had for sale, asking for tenders from those interested. This, we feel, has been a factor in slowing up general sales. These tenders will be open and considered within a few days.

Mr. Neil McLean, Fisheries Administrator, Wartime Price & Trade Board, called at the Committee's offices during the week, and the position of the Japanese fishing vessels was fully outlined to him.

In anticipation of acceleration on the removal of the Japanese from the protected coastal areas to interior points as soon as the B.C. Security Commission is fully functioning, your Committee, on the recommendation of Mr. Kimura, has appointed one reliable Japanese in each of the three fishing districts to act on behalf of Japanese fishing vessel owners in respect to the disposal of their vessels.

An appropriate form of Power of Attorney has been prepared and supplied to these men, so that they may have them executed by owners before they leave for interior points; and arrangement has been made with the Royal Canadian Mounted Police to defer the removal of these three appointees until their work with the Committee is completed.

A statement showing the position of the vessels and and values thereof, is attached hereto.

A. E. McMaster,
Executive Assistant.

Mr.K. Kirmura.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 7 - March 13, 1942.

35 vessels were sold during the week, and in addition 7 vessels were released to registered owners after verification of ships papers. In all, 209 vessels have been released to date, or about 20 per cent of the vessels now recorded with the Committee.

The Air Force and the Army Transport Department are seeking additional vessels, and our surveyors have assisted them in their selections. In all 8 additional requisitions are anticipated.

Inspection of vessels continues to show an active interest. We repeat the statement shown in last week's report and have added passes issued and the number of people inspecting vessels for the current week:

	No.Passes	No. People
Up to and including Feb. 12	20	43
Week ending Feb. 19	21	52
" " Feb. 26	92	165
" " Mar. 5	122	258
" " Mar. 12	145	268

In last week's report we expressed the opinion that the larger fishing companies would be stimulated into more active buying if the arbitration facilities set up by your Committee were used. We were able to bring one of the disputed cases with the Canadian Fishing Company to the Committee for arbitration this week, and had it promptly and satisfactorily settled. Arbitration was commenced on four other vessels, but application

Source: Nikkei National Museum, 2010-4-4-2-10-1
www.nikkeimuseum.org

was withdrawn, and the matter settled between the parties. All these five vessels were included in the sales approved by us during this week.

In the matter of settlement of claims for damage to vessels while in Naval Custody, the Commanding Officer, Pacific Coast, has submitted our recommendation that a fund be placed at the disposal of this Committee for the prompt settlement of claims surveyed jointly by the Committee's surveyor and the Naval surveyor, to the Secretary, Naval Board, Ottawa, and we are now awaiting decision.

A total of 35 claims, totalling $3273.96, has been assessed to date. This does not include the claims which will come from the large number of vessels already repaired in shipyards, or in process of being repaired.

Regarding the vessels coming within the jurisdiction of the Custodian of Alien Enemy Property, which were advertised for sale through the press, an analysis has not yet been made of the tenders submitted on these vessels, but we should be able to report on this matter in next week's letter,

A. E. McMaster,
Executive Assistant.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 8 - March 20, 1942.

50 vessels were sold during the week, and in addition 14 vessels were released to registered owners after proof of ownership was submitted to us. In all, 273 vessels have been released by the Committee to date, or about 26 per cent of the total registered with us.

In response to a request from the Department, for information asked for by Tom Reid, M.P. in Parliament on the 16th instant, we supplied information as to the number of each type of fishing vessel sold, and the average price secured for each type. This information was compiled up to an including the 17th instant. We have extended these figures up to the close of business on the 19th instant, with the following result:

Sale of Fishing Vessels to March 19th inclusive

Type	No.	Total Value	Average per Vessel
Seiners	26	$ 197,061.00	$ 7,579.27
Trollers	10	20,775.00	2,077.50
Gill-Netters	76	53,322.00	701.60
Packers	31	81,689.00	2,635.12
Unclassified	5	9,235.00	1,847.00
	148	$ 362,082.00	$ 2,446.50

The difference between these values and the total values of vessels sold as shown on attached statement, represents value of contracts other than vessel value, on which 1% commission has been assessed.

The Custodian of Alien Enemy Property has not yet com-

www.nikkeimuseum.org

pleted the sale of any of the vessels under his jurisdiction. He has conferred with the Committee, however, and we have assisted him in arriving at a conclusion on fair sale prices, and it is expected he will now conclude sales promptly.

During the week the Committee assisted Naval Officers in the inspection of a group of 30 boats from which to select a required 20 for Naval Service. These are of the Packer and Troller types, and are being reserved from sale, awaiting confirmation and requisitioning.

The Transport Department of the R.C.A.S.C. have asked us to reserve 7 selected boats of the Gill-Netter and Troller types, 6 of which it is expected they will requisition.

We expect that both services will conclude this matter within a few days.

A. E. McMaster,
Executive Assistant.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No.9 - March 27, 1942

54 vessels were sold this week, and in addition 15 vessels were released to registered owners when proof of ownership was established to the satisfaction of the Committee. In all, 342 vessels have been released to date, or about 33 per cent of the total registered with us.

The indications now are that 30 boats in all, of the Packer, Troller and Gill-Netter types, will be requisitioned by the services. Inspection and tests are being carried out prior to confirmation of requisition.

All remaining impounded vessels are being surveyed, and their values assessed. Progress report of this work is indicated in the statistical section hereof, and will form part of future Weekly Reports.

The Custodian of Alien Enemy Property has sold eight vessels of those coming directly under his jurisdiction, and advises that many others are under negotiation for sale. As these boats are subject to release orders by this Committee, they are included in the 1037 vessels shown as registered with us and in our release figures.

A. E. McMaster,
Executive Assistant.

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 11 - April 10, 1942

During the current week 67 vessels were sold, and 5 released to registered owners. In all, 573 vessels have been released to date, or 50 per cent of the total number now registered with the Committee.

The usual Weekly Statistical Report is attached. It will be noted that we have amended the figures shown under caption 1. "Vessels Registered." This represents the number of vessels taken into custody by Naval Service, of which this Committee has details. The details are still missing on other impounded vessels. It is now obvious that the total registration will exceed 1200 boats.

(Incl. Cannery owned Boats?)

It is not yet clear as to the exact number of boats which might be considered surplus to the fishing industry, but it seems probable that of the total of 1200 estimated above, 250 will be found to be surplus, on which basis over 60 per cent of the saleable boats have now been released by your Committee.

An analysis of all sales approved by the Committee's offices up to and including the 31st day of March, shows the following approximate distribution of values between the various types of vessels and the average price paid for each type:

Source: Nikkei National Museum, 2010-4-4-2-39-1
www.nikkeimuseum.org

Type	Number	Total	Average
Seiners	27	$194,011.00	$7,185.60
Packers	50	138,489.60	2,769.80
Trollers	14	26,020.00	1,858.60
Gill-Netters	197	119,909.34	608.70
Unclassified	14	31,066.30	2,219.00
	302	$509,496.24	$1,687.10

In the case of two contracts involving several larger vessels, nets and other fishing gear were included in the total sales value reported, on which we collected 1% commission. This amounted to $16,800.00, which added to the above total gives a grand total of sales up to the end of March of $526,296.24.

The vessels coming under the jurisdiction of the Custodian of Alien Enemy Property, and which were advertised for sale through the daily press in February, are now finding gradual sale. Our information is that bids on 15 to 20 of the 53 boats concerned, have been accepted by the Custodian.

A. E. McMaster,
Executive Assistant.

AEM/PH.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 12 - April 17, 1942

During the current week 55 vessels were sold, and 2 released to registered owners, making a total of 630 vessels released up to date, or 55 per cent of the total now registered with the Committee.

It is now evident that the peak of sales activity is past, and that the actual sales per week will reduce in volume.

We are conferring with the various fishing companies in an effort to arrive at an estimate as to the extent of their interest in the remainder of the fleet in the hands of the Committee, and will submit our conclusions in this matter at a later date, in relationship to the advisability of our releasing vessels for other purposes than the fishing industry.

The matter of the settlement of claims for damage and loss sustained to these fishing vessels while in the custody of Naval Authorities, is receiving active attention of the Committee this week, and it seems probable that arrangements for the vouchering of accumulated claims will be completed within a short time.

A. E. McMaster,
Executive Assistant.

K.N. AEM/PH.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 13 - April 24, 1942.

During the current week 39 vessels were sold and 2 released to registered owners, making a total of 699 vessels released, leaving, as will be noted by attached statement, 441 vessels of those registered with the Committee.

The largest part of these remaining vessels are at their Fraser River moorings, but there are also a small number at Ocean Falls, a number in the Skeena River, and at Prince Rupert.

In the statistical statement attached, we have added during the current week 29 boats shown under "Requisitioned by Services." These include 3 additional boats requisitioned by Naval Service, 6 by the Army Service Corps, and 20 which have been selected for shipment to the British Admiralty Technical Mission.

Our recent conferences with the fishing industry, confirm the opinion previously expressed, that the actual sales to fishermen and the fishing companies will sharply reduce in volume week after week, and that before long, the Committee will be justified in considering a change in policy to permit releases for other purposes than fishing.

The matter of procedure in the settlement of claims, having been generally agreed upon, the offices of the Committee are now preparing the necessary documents supporting their recommendations for settlement.

A.E. McMaster, Executive Assistant.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 14 - April 30, 1942

Mr Kimura

During the current week 40 vessels were sold and 4 released to registered owners after verification of ownership. This makes a total release of vessels to date of 743, or about 65 per cent of the total registered with the Committee.

We are further confirmed in opinions previously expressed, that the fishing industry as a whole, has now acquired the greater part of these Japanese fishing vessels in which they will be interested, and as a consequence, the Committee will shortly consider the advisability of recommending to the Minister of Fisheries that the remaining vessels be offered for sale to the general public.

An analysis of the vessels sold to date, shows that approximately 80% were purchased by the principal fishing companies and 20% by individual fishermen. However, these figures do not reflect the actual position of ultimate ownership in that in the case of gill-netter type and other small boats, which constitute the great preponderance of sales, the fishing companies have purchased almost entirely on behalf of specific individual fishermen who were unable to finance these purchases with their own resources.

Source: Nikkei National Museum, 2010-4-4-2-63-1
www.nikkeimuseum.org

Report of Progress - No. 14.

The general policy followed by the fishing companies in these cases, is to immediately resell the vessels to these fishermen at the price for which they were purchased, under a conditional sales agreement, giving them a reasonable period in which to acquire complete ownership. We are advised that no interest is charged by the companies on the unpaid balances.

A. E. McMaster,
Executive Assistant.

AEM/PH.

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 15 - May 7, 1942

During the current week 25 vessels were sold and 5 released to owners, making a grand total of 773 vessels released to date, or about 68 per cent of those registered with the Committee.

The Committee, in an endeavour to facilitate the purchase of boats by independent fishermen of small means, has arranged a system by which, with the co-operation of vendor and purchaser, the latter can attain ownership of a boat on payment of one-third of the agreed purchase price, the balance to be secured to the vendor on a seven per cent mortgage; the vendor's interest to be further protected by full marine insurance, costing five to eight per cent, depending on the number of boats offering. The Montreal Trust Company will act as collecting agents for the mortager. Their charge is five per cent on collections only, and is a charge against the vendor.

This plan is not expected to be an unqualified success, but it will be an answer to the criticism of the uninformed, who are reported to allege that the poor man has not been considered. The large fishing companies are reported to be selling boats on much more liberal terms.

A. E. McMaster,
Executive Assistant.

AEM/FH.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No.16 - May 14,1948

During the current week 40 vessels were sold and 5 released to owners, making a grand total of 818 vessels released to date, or over 70 per cent of those registered with the Committee.

In our Weekly Reports we have included under the caption "Vessels Registered", only those for which we had succeeded in obtaining description and other data, including names of owners. There is a substantial number of boats for which this information has not yet been secured, so that in all it is quite probable that the original estimate of 1250 boats must eventually be disposed of by the Committee. Various sources are being explored for the missing data.

The Committee's plan of making available to the individual fishermen, term purchase arrangements, has had the effect of temporarily stimulating sales, but in all cases cash payments were ultimately preferred by purchaser. The opportunity for term payment was presented, however; and as the Committee will probably recommend opening sales opportunities to other uses than fishing, the following telegram was sent to you today:

Source: Nikkei National Museum, 2010-4-4-2-79-1
www.nikkeimuseum.org

"SALES OF FISHING BOATS HAVE FALLEN OFF TO AVERAGE OF FIVE PER DAY WHICH RATE IS EXPECTED TO FALL SHARPLY AS SEASON APPROACHES STOP THE COMMITTEE WILL MEET ON MONDAY TO CONSIDER WAYS AND MEANS OF ACCELERATING SALES AND EXPECT TO RECOMMEND TO THE MINISTER THAT TUG AND LOGGING COMPANIES AND GENERAL PUBLIC BE INVITED TO TENDER IN ACCORDANCE WITH ROUTINE LETTER APRIL THIRTEENTH STOP ALL UNSOLD BOATS HAVE BEEN PRICED BY COMPETENT SURVEYORS AND ARE LABELLED IN ACCORDANCE WITH COMMITTEES VIEWSUSING SURVEYORS VALUATIONS AS BASIS"

Three of the boats selected for the British Admiralty Technical Mission were shipped during the week, and four additional boats are now ready, awaiting shipping instructions.

The method of assembling claims for damage and loss to fishing vessels, has been approved and the offices of the Committee are now submitting these regularly.

A. E. McMaster,
Executive Assistant.

AEM/PH.

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 17 - May 21,1942

During the current week 31 vessels were sold with no other releases; therefore, we have a total of 96 vessels sold and 10 released during the month of May to date, and the grand total of 849 vessels released, or 68 per cent of the new total of 1250 vessels now set up as registered with the Committee.

The Committee's exploration of the additional needs of the Fishing Industry, indicates that insofar as impounded Japanese fishing vessels are concerned, the releases already consummated to the industry insures that production will not suffer by reason of such impoundment.

As the Committee now has your approval that sales be thrown open to the general public, we are advertising through the daily press that this policy will go into effect on Monday the 25th instant. Copy of this advertisement is attached.

7 more of the boats selected for the British Admiralty Technical Mission have been ordered forward, and will be shipped at once. All of these vessels are already included under those shown as "Requisitioned by Services" on attached statement.

AEM/PH

A. E. McMaster,
Executive Assistant.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 18 - May 28, 1942

During the current week 28 vessels were sold and one released to registered owner, making a total of 878 vessels released in all to date, or 70 per cent of the total registered with the Committee.

The opening of sales to the public has had the effect of stimulating further sales to the fishing companies, and while a number of negotiations are under way for sales for other purposes, it is not expected these sales will be numerous, principally by reason of gasoline restrictions limiting utility.

Commander Johnson leaves for the East at the week-end to take up his new naval appointment. We now have your approval that the Commander will remain as a member of the Committee for consultation purposes.

The Committee has under consideration and study a further plan for accelerating the disposal of the balance of the fishing fleet, and will communicate details to you as soon as these have been further developed.

A.E.McMaster,
Executive Assistant.

AEM/PH.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

AMENDED REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES
No. 19 - June 4,1948

51 vessels were sold during the week, and with no other releases this brings the total number of vessels released to date to 909, or 72 per cent of the total registered with the Committee.

Very few vessels have been sold for other than fishing purposes, which was the position we anticipated on account of gasoline restrictions and the unsuitability of the vessels for general purposes.

A number of active negotiations are still under way, indicating continued interest of fishermen and fishing companies in acquiring vessels, but as stated in previous reports, the Committee is developing a plan with the object of accelerating disposition of the remainder of the fleet, a report on which will be included in our next Weekly Letter.

The average prices paid on vessels sold to May 31st were as follows:

Seiners	33	$6181.39
Packers	79	2372.32
Trollers	37	1643.92
Unclassified	30	915.54
Gill-Netters	483	672.84
All Classes	662	$1215.61

10 of the British Admiralty Technical Mission Vessels selected, and prepared for shipment by the Committee, have gone forward. This leaves 10 vessels, and shipping instructions have not yet been received for these.

No. 19 - June 4, 1942

31 vessels were sold during the week, and with no other releases this brings the total number of vessels released to date to 909, or 72 per cent of the total registered with the Committee.

Very few vessels have been sold for other than fishing purposes, which was the position we anticipated on account of gasoline restrictions and the unsuitability of the vessels for general purposes.

A numberof active negotiations are still under way, indicating continued interest of fishermen and fishing companies in acquiring vessels, but as stated in previous reports, the Committee is developing a plan with the object of accelerating disposition of the remainder of the fleet, a report on which will be included in our next Weekly Letter.

The average prices secured for the 664 vessels sold to date have been as follows:

Seiners	33	$ 618.00
Packers	79	2372.00
Trollers	37	1644.00
Unclassified	30	915.00
Gill-Netters	485	574.00
Total	664	$1195.00

10 of the British Admiralty Technical Mission Vessels selected, and prepared for shipment by the Committee, have gone forward. This leaves 10 vessels, and shipping instructions have not yet been received for these.

See Amended Report
AEM/FH.

A.E.McMaster,
Executive Assistant.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES
No. 20 - June 11, 1942

34 vessels were sold during the week and one released to the registered owner. A total of 944 have been released to date, or 75% of the total number of vessels registered with the Committee.

In seeking a practicable method of securing prompt disposal of the remaining fishing vessels, the interests of the fishing companies which have purchased 80% of the vessels already sold, those of individual fishermen and those of the Japanese owners have been considered.

The Committee has had in mind a question raised by the fishing companies at a meeting with the Committee last February, when apprehension was expressed as to the effect on the value of vessels purchased, should the Committee at some later time dispose of surplus vessels at distressed prices. At this meeting it was agreed by the Committee that when this time arrived, the various interests would be consulted before taking any action that might be detrimental to the purchases made.

Since the fishing industry and the people have now been given every reasonable opportunity to secure vessels by purchase through free negotiation with owners, the Committee is of the opinion that the vessels now remaining must be disposed of promptly, particularly for the reason that the Naval Service should be relieved of the custodianship in order that the personnel now so occupied can be assigned more important duties.

Source: Nikkei National Museum, 2010-4-4-2-110-1
www.nikkeimuseum.org

With this in view, the Committee has under discussion with the fishing companies, which have facilities for properly storing and maintaining these surplus vessels, the following plan:

The companies are being urged to purchase additional vessels to the limit of their ability, at prices fixed by the Committee, and based on surveys made by the Committee's experienced surveyors.

After a short time when this means of disposal has been exhausted, the Committee is requesting the fishing companies to accept custodianship of all the remaining vessels and to assume responsibility for ordinary maintenance under the provisions;

That such vessels will be available for sale from their place of storage to any eligible purchaser;

And that as compensation for the care and maintenance of vessels, the companies concerned be credited for an annual amount to be agreed upon, for each vessel so stored, until the expiry of the arrangement.

This is merely an outline of the plan being promulgated, and we believe it will be favorably considered by the companies. The operating managers of the principal companies have gone to their northern canneries, Prince Rupert, Skeena River, and Rivers Inlet this week, and on their return next week it is expected we shall be able to deal with the proposal to a conclusion with reasonable despatch.

A. R. McMaster,
Executive Assistant

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 81 - June 18, 1948.

22 vessels only were sold during the week and four released to registered owners, bringing the total number released up to dat e to 970, or 77 per cent of the total number of vessels registered with the Committee.

The Committee's negotiations with the principal fishing companies which have the facilities for storing the remainder of the fishing fleet, are progressing favorably, but present indications are that we cannot hope to complete satisfactory details much before the end of the month.

The plan presently favored is that these companies will take over the custodianship of the remaining vessels at their present moorings, insofar as Fraser River boats are concerned, except a small group of vessels which are considered almost valueless,and which can be excluded and sold separately.

This residue of the fleet generally, consists of older vessels and of lower value than those already sold, which is indicated by the following figures:

over

JAPANESE FISHING VESSELS DISPOSAL COM[illegible]TEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 22 - June 25, 1942

28 vessels were sold during the week, making the total sold to date 779 boats, and the total released to all groups 998 boats, or 80% of the vessels registered with the Committee.

The refusal of the Fishing Company Group to accept our plan for the custodianship of the remaining vessels and the Committee's opinion of alternate procedure, is explained in the copy of our letter of June 26th to the Deputy Minister of Fisheries, attached.

These Companies led the Committee to believe the plan submitted would be accepted by them as a group and we believe the actual reason for final rejection was failure to agree amongst themselves as to a division of the responsibility. No single Company would assume this, therefore other means of final disposal are being explored.

A.E.McMaster,
Executive Assistant.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

Committee:
THE HONORABLE MR. JUSTICE SIDNEY SMITH
CHAIRMAN
COMMANDER B. L. JOHNSON, O.B.E., R.C.N.R.
KISHIZO KIMURA

A. E. McMASTER, EXECUTIVE ASSISTANT

1528 MARINE BUILDING
VANCOUVER, B.C.

June 26, 1942.

Deputy Minister,
Department of Fisheries,
Ottawa.

Dear Sir:

Confirming telegram of this date, reading as follows:

"Refer our letter June twentieth re negotiations with company group for acceptance custodianship remaining vessels. Regret advise companies have finally rejected proposal and there now seems little hope finding other means bulk disposal. Companies promise further purchases immediately and Committee's opinion is that few weeks should be allowed to exhaust potential market and thus reduce residue of vessels to more practical storage proportions. Airmail letter today."

It was, of course, most disappointing to the Committee that the fishing companies could not be persuaded to carry out the plan of taking over the custodianship of the remaining vessels, especially as we were led to believe that each member of the group was in agreement.

From the first, the Committee estimated that there would be a surplus of some three hundred of these vessels. There have been over a hundred vessels actually sold in the current month to date - twenty-eight in the last week - so the market potentialities cannot be considered as completely exhausted. The fishing companies have agreed to review their position again immediately and will endeavour to increase their purchases.

There are quite a number of vessels on which a low valuation has been placed by reason of their age or condition. We propose immediately offering the boats in this category to the small shipyards in groups, and indications are that we shall be able to dispose of a fair number in this way.

The Committee is keenly aware of the necessity of releasing Naval Service as quickly as possible, and it was with this in view that negotiations were confined to the principal fishing companies. These means having failed, the Committee has reviewed the entire situation and feels that we should carry on an intensive sales campaign for the next few weeks in order to completely exhaust the potential market and also reduce the residue to a practical storage problem.

Deputy Minister,
Department of Fisheries.
Page 2

June 26, 1942.

It would now seem that if prompt transfer of custodianship is to be managed, it must be to one of the permanent departments of the Government; such as, the Department of Justice, the Department of State through the Custodian of Alien Enemy Property, or the Department of Fisheries.

It should be borne in mind that the residue of the Fraser River fleet, which it is hoped might be reduced to one hundred vessels within a few weeks, will probably require storage over a considerable period. Storage at the present moorings or with vessels afloat at some other point would not be an economic method, and therefore our thought is that dry storage should be considered.

There are many places available along the Fraser River where a few acres of cleared land can be secured and the vessels pulled ashore and stored compactly at a comparatively small expense. With this done, a complete survey could readily be made and custodianship turned over to a permanent department.

We are awaiting advice from Commander Reid, Naval Officer in Charge, at Prince Rupert, as to the current position there. We shall make recommendations as to disposition of the vessels remaining in this district as soon as this is received and analysed.

Yours very truly,

A. E. McMaster,
Executive Assistant.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 33 - July 8, 1948

During the week under review there were 22 vessels sold and 2 released to registered owners after verifying ownership and surveying vessels.

In our statistical record attached, we have re-classified the total registration of vessels as to type in accordance with revised catalogue received from Naval Service at New Westminster and Prince Rupert, from which it will be noted that the total registered is now 1365, compared with 1350 which we have been carrying in our report for some time.

Of the 238 vessels remaining at July 2nd, 17 are at Prince Rupert and 20 are vessels coming under the authority of the Custodian of Alien Enemy Property; so that of those left at New Westminster moorings and in local small shipyards, there are 201 vessels.

There are still considerable active negotiations for these vessels, and sales efforts should be continued for at least another two weeks.

We have now suggested that the logical method of relieving Naval Service from the custody of the remaining vessels, would be to turn them over to the Custodian of Alien Enemy Property. Involved in this custody is the guarding of the fleet from theft and fire, the maintenance of the

Source: Nikkei National Museum, 2010-4-4-2-134-1
www.nikkeimuseum.org

vessels at their moorings, and surveying as vessels are sold or otherwise disposed of.

Col. C.H. Hill, Divisional Officer Commanding, Royal Canadian Mounted Police, has just advised us that he has been instructed to take the responsibility of guarding the fleet, but that the maintenance and any other work necessary would be assumed by the Department of Fisheries.

The Committee is of the opinion that the responsibility should not be divided; but if this is the decision reached by Ottawa, we shall render every assistance to the permanent Department concerned.

A. E. McMaster,
Executive Assistant.

AEM/FH.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 24 - July 9, 1942

The favorable opening of the Sockeye salmon season has created the anticipated stimulus to further vessel purchases.

During the current week 22 vessels were sold or nearly the average of the sales for the past seven weeks. The immediate indications are that the next week or two will continue to show the same purchasing interest.

The vessel inventory, shown on attached statement, is distributed as follows:

(a) Vessels at Prince Rupert.

(b) Vessels under the control of the Custodian of Alien Enemy Property.

(c) Vessels at Fraser River moorings under the jurisdiction of the Committee.

(d) Total.

	Report A	Custodian B	Committee C	Total D
Seiners	-	2	1	3
Trollers	-	2	37	39
Gill-Netters	14	8	73	95
Packers	1	4	20	25
Misc.(Cod Boats)	1	4	50	55
Totals	16	20	181	217

The Prince Rupert vessels do not present an immediate problem, and the Custodian vessels are being removed from the fleet, thus leaving for other disposal 181 vessels as shown under caption (c), as the problem requiring the quickest possible solution in order to relieve navy personnel.

Source: Nikkei National Museum, 2010-4-4-2-145-1
www.nikkeimuseum.org

An analysis of the majority of these 181 vessels as to age of hull shows the following:

A.B.C.	Trollers %	Gill-Netters %	Packers %	Misc.Cod Boats, Etc. %
1 to 5 yrs.	-	15	7	7
6 - 10 "	14	36	13	20
11 - 15 "	58	31	33	45
16 - 20 "	21	11	27	22
Over 20 "	7	7	20	6
Total	100	100	100	100

A practical appraisal of these vessels would consider two classifications:

(a) Those in good to fair condition, and immediately usable for fishing.

(b) The older vessels and those in a poor state of repair, which have outlived their usefulness or have nearly reached that state.

Dry storage would be the most economic method of disposing of surplus vessels, but deterioration under this method would be rapid. Floating storage such as that being used at present moorings, over a long period, would be an expensive undertaking.

With these factors in mind the Committee has considered it advisable to advance a revised proposal to the principal fishing companies with a view to immediately disposing of the usable vessels, i.e. those in category (a). If successful in this plan, the vessels concerned would be maintained in a condition for prompt use as required, in the fishing industry. Our estimates indicate that this method and other sales over a short period, would reduce the remaining fleet

Source: Nikkei National Museum, 2010-4-4-2-145-2
www.nikkeimuseum.org

to not more than 75 boats, principally those in (b) classification.

Two of the larger fishing companies have facilities for dry storing and have tentatively agreed to store up to 75 or 80 vessels; so that if our present plans succeed, the entire fleet could be disposed of without the necessity of placing responsibility on any of the permanent Departments of the Government.

In the light of the failure of the fishing companies to accept our former plan, we report this revised plan, prior to consummation, with reluctance; but indications are favorable at this time, and the Committee felt you should be immediately advised of our efforts in view of the Department having the entire problem under active consideration.

In addition to the usual Weekly Statement, we enclose a summary of the distribution of sales to June 30th, and an analysis showing the types of vessels and average prices of sales to the same date.

A. E. McMaster,
Executive Assistant.

AEM/PH.

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 25 - July 16, 1948

Sales for the week equalled exactly those of the two previous weeks, viz. 22 vessels, bringing the total vessels released to date to 1072, or 84.6% of those registered with the Committee.

The Committee's revised plan of relieving Naval Service from the custodianship of the remaining vessels in the Fraser River has progressed during the week.

To effect the transfer of custody, a joint survey by representatives of each agency is necessary. This survey commenced on the 15th, and in order to avoid interference or confusion, all permits for inspection by others than interested parties, were discontinued. Consequently sales will be practically suspended until vessels are available for inspection at their new moorings.

50 vessels of the preferred class have been selected and examination for further selections is being continued concurrently with the surveying operations.

The Committee is receiving excellent co-operation from those fishing companies which are accepting responsibility and from Naval Service, and every possible effort is being made to successfully conclude the prompt transfer of vessels.

Source: Nikkei National Museum, 2010-4-4-2-154-1
www.nikkeimuseum.org

The last 3 vessels selected by the British Admiralty Technical Mission are ready for shipment and will be despatched immediately on receipt of shipping permit.

At this date 214 Loss and Damage Claims have been registered, totalling in value $41,644.05, of which 128, value $35,600.18, have been completed and vouchered.

A.E.McMaster,
Executive Assistant.

AEM/PH.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 26 - July 23, 1942

Negotiations with the fishing companies to take over custody of the remaining fishing vessels is proceeding very slowly, principally owing to the difficulty they have had in securing the necessary equipment and men to prepare moorings. They took delivery of 31 vessels during the week, and while it is difficult to estimate the total number they will select, it seems probable that they will take another 40 or 50 before the end of the month.

Only 4 sales were effected during the week, and it is not expected there will be many more until after surveys and transfer of custodianship are completed.

The Custodian of Enemy Property is taking over the responsibility of the vessels coming under his jurisdiction, and we have shown these as released in attached statement.

Of the 149 vessels remaining under the jurisdiction of this Committee on July 23rd, 133 are at the Fraser River moorings; so that if our present estimate as to the additional number of vessels the fishing companies will select, is correct, we will have less than 100 vessels for which to find other disposition, in addition to the 16 vessels remaining at Prince Rupert.

Fraser 133
Rupert 16
149

Source: Nikkei National Museum, 2010-4-4-2-162-1
www.nikkeimuseum.org

We have not had any confirmation as to the Custodian of Enemy Property taking over the responsibility of the vessels remaining at the end of this month, but should this be the decision of Ottawa, the Committee has agreed to co-operate with the Custodian in finding the final dispositions.

At the request of the Department of Munitions and Supply, the Committee is negotiating with the Japanese owners for the purchase of the vessels requisitioned by Naval Service and by the R.C.A.F. These vessels are included in the attached statement under the Caption "Requisitioned by Services" and we have this matter actively in hand.

A. E. McMaster,
Executive Assistant.

AEM/FH.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 27 - July 31, 1948.

During the week arrangements were completed for the transfer of the custodianship of all vessels remaining unsold or otherwise unreleased by the Committee, to the Custodian of Enemy Property.

A joint survey is now under way which, when completed, will enable the Committee to reconcile all vessel statistics; therefore, we are omitting our usual statistical summary this week.

The fishing companies have taken 56 vessels under the plan referred to in previous letters. This will leave just over 100 vessels at the Fraser River moorings and 16 at Prince Rupert. The intention of the Custodian is to leave the Fraser River vessels at these moorings for the present, and until a more suitable disposition can be found.

The final 5 British Admiralty Technical Mission Vessels have now gone forward and the Committee is completing negotiations with the owners for settlement in respect to all of the 20 boats involved.

The intention is that the Committee will release several members of the staff to carry out the added work undertaken by the Custodian of Enemy Property. The re-

Source: Nikkei National Museum, 2010-4-4-2-171-1
www.nikkeimuseum.org

maining staff will be occupied in completing Naval claims; settlements as to forced sales; settlements as to purchased B.A.T.M. boats and those requisitioned by the Royal Canadian Services.

An important feature of the final work of the Committee will be the assembly of all data in respect to boat files. It will be necessary to have these in complete form for future reference. There are at least 1200 of these files which will, when the Committee is dissolved, be turned over with other records to the Custodian of Enemy Property.

A.E.McMaster,
Executive Assistant.

AEM/TH.

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 88 - August 6,1942

Transfer of the vessels remaining in the Fraser River, from Naval Service to the Custodian of Enemy Property, was completed this week in accordance with Order in Council, P.C.6247 of July 20th.

Coincident with this transfer, a joint survey was made by the marine surveyors of Naval Service and the Custodian, and individual survey reports by the former are now filed with the Committee in relation to the settlement of Naval Claims.

The figures on the attached statement have been adjusted to show the disposition of all vessels which have passed through the release authority of the Committee. All further releases will be made by the Custodian; therefore, further statements submitted by this office until the dissolution of the Committee, will be chiefly concerned with finances.

The Committee is making every effort to bring all matters pertaining to the boats released through its offices, and pertaining to Naval Claims, to as nearly a point of completion as possible before turning records over to the Custodian.

An arrangement is under discussion with the Custodian whereby the staff of the Committee will co-operate, in the meantime, in assisting the Custodian in the handling of the added work involved in unsold vessels. This will permit a gradual reduction of the Committee's staff and insure the most effective means of the final transfer of all records.

AEM/PH. A.E. McMaster, Executive Asst.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 29 - August 15,1942

During the week all records pertaining to the vessels taken over by the Custodian of Enemy Property were assembled and transferred to his office in the Royal Bank Building.

One member of the Committee's staff was taken over by the Custodian, and the services of our marine surveyors were discontinued.

The balance of our staff will be required until the end of the current month, after which a reduced staff will bring the records and affairs of the Committee to a point of completion, favorable to transfer to the Custodian.

The detail involved in this work has been reviewed with Dr. D. B. Finn, Deputy Minister, and we have had his helpful suggestions as to policies in final procedure.

Instructions as to the purchase of 27 vessels requisitioned by Naval Service, and 6 vessels requisitioned by the Royal Canadian Air Force, have been received from the Department of Munitions and Dupply. In addition to these vessels there have been 11 requisitioned by the Royal

www.nikkeimuseum.org

Canadian Army Service Corps. It is expected that in view of the change of policy in respect to requisitioned vessels, instructions to purchase will be received for these vessels.

The attached statistical report contains revised figures up to August the 13th.

A. E. McMaster,
Executive Assistant.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No.30 - August 20, 1942.

We attach a revised, up to date, statement of the disposition of the Japanese fishing vessels registered with the Committee.

Practically all changes from now until the records of the Committee are closed, will be concerned with the transfer of vessels between captions; for instance, as purchases of vessels are completed, they will be added under caption "Sales." The financial figures, of course, will change each week as collections and disbursements are made.

Some of the owners concerned in "forced sales" are voluntarily signing Bills of Sale, and thus regularizing transactions.

A. E. McMaster,
Executive Assistant.

AEM/YH.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 31 - August 27,1942

The activities of the Committee's office is now confined to assembly and verification of all vessel history files; the assembly and vouchering of Naval claims; completion, insofar as possible, of "forced sales"; and the negotiation and purchase of vessels requisitioned by the Services.

The staff will be further reduced during the coming week and the remaining work carried through to a practical conclusion by a skeleton staff.

The matter of handling "forced sales" has been discussed with the Custodian, and agreed that the Committee would continue its efforts to regularize these sales through inducing owners to execute bills of sale, until all records were transferred. The response of owners is gratifying. Of 147 sales we have succeeded in completing 80 or 55%.

Negotiations for the purchase of requisitioned vessels are progressing favorably. Of 33 vessels involved, owners of 18 have so far agreed to the terms offered, and the final papers are in process of completion.

The attached statement shows no change from previous week, insofar as the vessel distribution is concerned. The financial summary reflects the position of collections, disbursements, etc. up to and including August 27th.

A.E.McMaster,
Executive Assistant.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 32 - September 3, 1942.

The negotiations for the purchase of vessels requisitioned by Naval Service and Air Force are progressing as satisfactorily as can be expected under the circumstances of having to deal with owners by letter and telegram at evacuee camps.

The basis of purchase as directed by the Department of Munitions and Supply is "Lloyd's appraisal price" as approved by the Advisory Board on requisitioning.

Contentious points which the Committee must overcome before completing these purchases relate to the

(a) the differential claimed between "Lloyd's appraisal price" and current market values and

(b) charter money for the period from the time of requisitioning to the completion of purchase.

The status of negotiation may be summarized briefly, as follows:--

		Vessels
1.	Purchases completed - Bill of sale forwarded to the Department at Ottawa	6
2.	Owners consent secured, documents in process of completion	12
3.	Negotiations progressing satisfactorily	7
4.	Negotiations slow owing to resistance of owners	7
	Total	32

Source: Nikkei National Museum, 2010-4-4-2-203-1
www.nikkeimuseum.org

It is expected that the same policy as above, in requiring transfer of title for 11 Army Service vessels will be adopted, but as yet instructions to purchase have not been received.

In the attached statement of the distribution of all vessels handled through the offices of the Committee we are following the procedure of leaving all requisitioned vessels under that caption until settlement is received from the Government Agency concerned, when transfer is made to the caption "Sales"

Many owners of vessels concerned with "Forced Sales" are responding to our request that they regularize these Sales by completion of a formal bill of sale, so that the vessels remaining in this category when the Committee dissolves should not prove burdensome to the Custodian. Of 147 vessels concerned, we now have 85 completed bills of sale.

The assembly and verification of vessel history files, Naval claims and other work necessary to a practical transfer of the Committee's records, is progressing with a reduced staff.

A. E. McMaster,
Executive Assistant.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 53 - September 10,1948

The negotiations in converting charters of requisitioned vessels to purchases, for the Naval Service and Air Force, continue to show progress. Over 50 per cent of these vessels are now under Bill of Sale, and the offered prices on others have been accepted. No instructions have yet been received for the purchase of Army Service boats.

About two-thirds of our "forced sales" have been regularized, and progress is being made in the other closing work of the Committee's offices.

A further reduction of staff will be possible within a few days, but the other members will be required until the work is completed.

The attached report shows little change from the previous report, but we shall continue submitting a similar statement each week, until our final report, so that all files will be complete.

A. E. McMaster,
Executive Assistant.

AEM/VH.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 34 - September 17, 1942

In reporting the vessels released by the Committee to licenced owners in our Weekly Letters, not all vessels so released were included, principally for the reason that they were not in the main naval lists. On analysing the individual vessel files, preparatory to turning them over to the Custodian, it was thought advisable to include all such vessels so that our tabulations would be complete as to the total number of vessels released back to the fishing industry, whether omitted from impounding action or otherwise. These additional vessels are included in the attached statement, which brings the total vessels released to 1322.

The following summary of vessels sold through the office of the Committee to August the 31st, 1942, shows the relation of purchase of each type released to the principal fishing companies and to individual fishermen, as well as the total average price realized. A complete analysis of this information will be included in our final report:

	No of Vessels			Average Price
	Fishing Co's	Individuals	Total	
Seiners	42	11	53	$5694.00
Trollers	18	38	56	1337.00
Gill-Netters	504	114	618	623.00
Packers	74	20	94	2275.00
Misc.	19	33	52	765.00
Total	657	216	873	1163.00
Per Cent	75	25	100

www.nikkeimuseum.org

* N Only - Re correction on following Report No

All purchases have now been completed and the Bills of Sale sent to the Department of Munitions and Supply at Ottawa, on the ex Japanese vessels presently under charter for Naval Service and Air Force. We are meeting with some resistance from the owners of the remaining vessels, and it is somewhat difficult to deal with them by mail at their evacuation camps. However, we hope the entire matter will be cleared up before closing our offices.

No definite instructions have been received on the 11 vessels being used by Army Service Corps, but the Department anticipates authorizing the purchase of these shortly.

Continued progress is being made in the assembly of the other final work of the Committee, such as the vessel history files, N aval claims and "forced sales." In respect to the latter, of 152 "forced sales" made by the Committee, 102 or two-thirds have now been regularized by securing a formal Bill of Sale from the Japanese owners.

A.E. McMaster,
Executive Assistant.

AEM/FH.

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 35 - September 24, 1948

In our last Report No.34, on Page 2, through a typographical error, we advised that, all purchases of Service vessels had been completed. This should have read, 21 purchases had then been completed.

A further 7 vessels were purchased during the current week, leaving only 5 of the Navy and Air Force vessels to complete.

No decision has been reached on the 11 Army vessels as yet.

The other concluding work of the Committee is progressing satisfactorily and will be brought to a conclusion as rapidly as possible.

A. E. McMaster,
Executive Assistant.

AEM/PH.

KK

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 36 - October 3, 1942

The method of transfer of the Committee's accounts and records has been discussed and agreed upon, with the Custodian of Enemy Property.

It has been arranged that the accounts will be audited by Mr. S. V. Roberts, Supervising Treasury Officer, and that this work will be done as preliminary to transfer of all records.

The Committee's Executive Assistant adjusted suspense matters in relation to the purchase of Service Vessels and as to Naval Claims, while in Ottawa last week.

The first payments for Naval Vessels were secured by him and the amount concerned, viz. $170,640, is embodied in the attached statement.

The status of the principal concluding work of the Committee is reflected in the following:

Purchase of Service Vessels - Including
20 B.A.T.M. - 27 R.C.N.B. - 6 R.C.A.F. - 10 R.C.A.S.C.

	No.	%

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

KC

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES
No.37 - October 15, 1942.

When the Committee recommended that the records and unfinished business of its offices be turned over to the jurisdiction of the Custodian of Enemy Property, the Principle adopted was, that the final work should be brought to as near a practical conclusion as possible. This was agreed to with Mr. McPherson, the Custodian, when he consented to support our recommendation.

It has now been agreed between us that the Custodian will take over one of the members of the Committee's staff, who is familiar with the handling of Naval Claims, and that the audit of the Committee's accounts and records commence next Monday, Oct. the 19th. Mr. S. V. Roberts, Supervising Treasury Officer in Vancouver, has been authorized to supervise this audit.

In respect to "forced sales". The present status is that of 152 sales made under this plan, 107 (70%) have been regularized by securing the signature of the Japanese owner on regular Bills of Sale, thus clearing title for the new owners.

The Committee realizing its obligation to the new owners of the remaining 45 vessels, has induced the Custodian of Enemy Property to execute Bills of Sale in favor of these owners, and thus coincidental with the audit of the Committee's records, these titles will all be cleared through the offices of the Committee.

Source: Nikkei National Museum, 2010-4-4-2-217-1
www.nikkeimuseum.org

Progress continues to be made in the clearing of the purchases of Service Vessels. The status of these purchases as at October the 15th, is as follows:

	Total Concerned		Purchases Completed			
	No. Vessels	Value	No.	%	Value	%
Naval Service	27	$281,530	23	85	$228,790	81
R.C.A.F.	6	30,000	5	83	23,900	80
R.C.A.M.C.	10	16,520	7	70	11,680	71
Total	43	$328,050	35	81	$264,370	80

It is interesting to note that the late exceptional run of salmon in the Fraser River has again renewed interest in the remaining Japanese vessels. We are advised that the Custodian has sold 42 vessels of those turned over to them by the Committee.

There is no change during the current week in the summary of vessels released through the Committee from that shown on our Weekly Letter of Oct. the 8th. We shall, therefore, not repeat this information in this letter.

The summary of values to date as at October the 15th is as follows:

Value of Sales	$1,276,083.89
Cash Payment on Sales	1,034,979.62
Disbursements to Vendors	868,958.86
Remittances to Receiver General	13,195.63
Earnings on Commission to Date	12,760.83
Survey Charges to Date	2,294.50

REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 58 - October 22, 1948

The auditors appointed through the Treasury Office of the Finance Department, Vancouver, commenced the audit of the Committee's records on Thursday morning, Oct. 22nd. We shall expect to report the approximate time of completion of the work in our next Weekly Letter.

The reduced staff of the Committe is continuing to function in respect to Naval claims, the purchase of Service vessels and regularizing "forced sales" and will continue to do so until the audit is complete.

Further payments have been received and disbursements made relative to Service vessels during the week, and the summary of values of all Committee's financial records as at Oct. 22nd, is as follows:

Value of Sales	$1,334,233.89
Cash Payment on Sales	1,093,129.62
Disbursements to Vendors	940.092.32
Remittances to Receiver General	13,195.63
Earnings on Commission to Date	13,342.33
Survey Charges to Date	2,342.50

JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

FINAL REPORT OF PROGRESS TO THE HONOURABLE THE MINISTER OF FISHERIES

No. 39 - October 31st, 1942

The Auditors of the Finance Department are making good progress in checking the financial transactions of the Committee and arrangements have been completed with the Custodian of Enemy Property as to the procedure to be followed in taking over all records. Transfer of these records however cannot be made until the audit is completed, therefore the actual date of transfer is dependent on this factor. The remaining staff of the Committee is giving the auditors every possible assistance in accelerating this work.

A comprehensive report of the work of the Committee will be completed coincidentally with the closing of its offices. The report will contain complete figures of the finances and other statistical data of the Committee's activities. In advance of this report we submit the attached statement of the position as at October 31st, 1942.

The principal change in the financial figures from those in this statement will be in the disbursements to vendors. The undistributed amount of $95259.10 remaining at the end of October is principally made up of the funds remaining in our hands from the sale of vessels to the Department of Munitions and Supply for the Navy, Air Force, and Army Services. Prior to paying the Japanese owners we are required to clear mortgage and other encumbrances, and we hope to have this job completed during the audit, so as not to complicate the subsequent work of the Custodian.

Source: Nikkei National Museum, 2010-4-4-2-219-1
www.nikkeimuseum.org

Included also in this balance is the unpaid amount due to owners whose vessels were sold by the Committee as "forced sales". The position at October 31st in this respect was:

	No. Vessels	%	Amount	%
Total Vessels Sold	152	100	$ 72031.00	100
Regularized by Execution of Bills of Sale - Oct. 31, 1942	136	89	63890.00	89
Remaining to be Regularized	16	11	8141.00	11

On representations made by us to the Custodian, he has agreed to execute bills of sale for these remaining vessels, thus enabling us to clear the balances involved prior to transfer.

The position of the purchase of Service vessels and those for British Admiralty Technical Mission as at October 31st is as follows:

Vessels Concerned	No. Vessels	Amount	%
B.A.T.M.	20	$ 70315.00	
R.C. Navy	26	265690.00	
R.C. Air Force	6	30000.00	
R.C. Army	10	16520.00	
Total	62	382725.00	100
Negotiations for Purchase Completed	57	338325.00	92
Payments Received by Committee	43	299105.00	70

FINAL REPORT OF JAPANESE FISHING VESSELS DISPOSAL COMMITTEE

1. Introductory Remarks:

Immediately following the declaration of war on Japan in December 1941, steps were taken by Naval Service to bring into custody all fishing vessels owned by persons of Japanese nationality or Japanese origin.

Over 1300 vessels of different types were involved and these vessels were situated at many places along the entire length of the British Columbia coast.

The method adopted was to assemble vessels at specific mooring areas, principally in the Fraser River near New Westminster where about 1,000 vessels were moored. About 200 vessels were stored in Tuck's Inlet at Prince Rupert and the remainder at other outports.

Vessels were immobilized when seized or after being towed to moorings, by removing vital engine parts and certain navigational instruments.

Circumstances attending the mass assembling of vessels at temporary moorings, in one small area in the Fraser River, under the severe weather conditions prevailing in December and January, caused considerable damage to individual units. Both hull and engine damage occurred and a number of small boats sank at their moorings.

This first impounding action contemplated only immobilization, consequently no provision was made for conditioning vessels for sale, prior to the forming of the Japanese Fishing Vessels Disposal Committee.

Source: Nikkei National Museum, 2010-4-4-2-221-2
www.nikkeimuseum.org

2. Origin and Purpose of the Committee:

The removal of this substantial part of the fishing fleet from active production, when this product was of vital importance to the food supply of the United Nations, prompted the Government to appoint a Committee for the purpose of returning these vessels to active fishing in the hands of fishermen of other than Japanese origin, so that the defence measure of impoundment should not result in a decrease in the production of the fishing industry of British Columbia.

Therefore, under the authority of the War Measures Act, and of Order-in-Council, P. C. 288, of January 13th, 1942, this Committee known as the Japanese Fishing Vessels Disposal Committee was created with the following personnel:-

The Honourable Mr. Justice Sidney Smith - Chairman.
Commander E. L. Johnson, D.S.O., R.C.N.R.
Mr. Kishizo Kimura.

The terms of reference recited in Order-in-Council, as above were as follows:--

(1) "To make such arrangements as will make it possible for the present owners of detained vessels to freely negotiate for charters, leases, or sales of such vessels as they own to persons other than those of Japanese origin, provided that the Committee approve of such charters, leases, or sales, which approval shall be a prerequisite for the use of such vessel under fishing license.

(2) Where necessary, to arbitrate disagreements on price between owners and intending purchasers with a view to preventing advantage being taken of duress.

(3) To report on claims which may be made on the government for damage to, or deterioration of, the vessels and equipment while under detention.

(4) To report on claims which may be made on the government for the returning of the detained vessels from their present storage place to places where they were picked up.

(5) By consultation with the Department of Fisheries, to determine which of the detained vessels shall first come under the arrangements to be put back into production.

Source: Nikkei National Museum, 2010-4-4-2-221-3
www.nikkeimuseum.org

(6) To report on steps that should be taken to dispose of vessels which the present owners are unable to sell, charter, lease or otherwise transfer".

3. Organization and Initial Steps

The Committee held its first meeting in Vancouver on January 24th, 1942, when Mr. A. E. McMaster was appointed as Executive Assistant and initial procedure determined.

The necessary staff was immediately organized and the Committee's offices were opened to the public in the Marine Building on January 28th, 1942.

With advent of this Committee, it became necessary to reverse completely the immobilization procedure. Vessels had to be reconditioned for active fishing service and placed in a position which would permit the Committee to promote their sale to eligible fishermen.

In cooperation with the Committee, the Naval Service proceeded to carry out the following, late in January 1942.

(1) Raise sunken vessels and place them in local shipyards for overhaul.

(2) Repair hulls and engines of other vessels as required.

(3) Provide adequate moorings and assemble vessels thereat in a position to permit inspection by prospective buyers.

(4) Provide a ferry service for prospective buyers from New Westminster Terminals to the Fleet.

(5) Catalogue vessels by name and location at moorings.

Source: Nikkei National Museum, 2010-4-4-2-221-4
www.nikkeimuseum.org

Pending the availability of this fleet to inspection by prospective purchasers, the offices of the Committee engaged in assembling the necessary data to permit of a comprehensive sales campaign, and to set up practical policies to accomplish the return of vessels to the Fishing Industry as quickly as possible.

Listing of vessels by Japanese owners was promoted with the very effective help of Mr. K. Kimura. This enabled the Committee to prepare detailed descriptive vessel sheets which were segregated according to type and made available to the public.

The Committee consulted with the principal Fishing Companies, Fisheries Associations, Unions, and the Chief Supervisor of Fisheries, as to the requirements of the Industry. The markets were otherwise explored and the public informed through the press, and in extensive advertising, and by circular as to the procedure necessary to purchase these fishing vessels.

Governing Policies Adopted by the Committee:

The general procedure adopted is briefly listed as follows:-

(1) Prospective purchasers were encouraged to freely negotiate with Japanese owners towards a mutually satisfactory purchase agreement. To this end the facilities of the offices of the Committee were made available.

(2) Having in mind that the Committee was a temporary agency and that it was desirable to secure transfer of title, only outright sales were approved.

(3) Term payments were permitted providing substantial cash payments were made, and providing deferred amounts were covered by mortgage. Deferred payments, however, were the responsibility of the contracting

Source: Nikkei National Museum, 2010-4-4-2-221-5
www.nikkeimuseum.org

parties, the Committee assuming no responsibility therefor, except the approval of the terms of sale.

(4) In the event of a dispute between parties as to price, the services of the Committee were offered to abritrate differences.

(5) Facilities for inspection of vessels were provided through the issuance of permits and by the operation of a regular ferry service from New Westminster Terminals to the Fishing Fleet moorings.

(6) When a vessel was sold and damage or loss of equipment was claimed, provision was made for inspection by the surveyors of the Committee and Naval Service prior to release of vessel. Where loss or damage was found by surveyors to have occurred while vessel was in the custody of Naval Service, allowance was recommended under certain prescribed principles explained later in this report under section dealing with "Naval Claims".

(7) When an agreement for sale was approved by the Committee, the cash payment involved was paid in to the offices of the Committee, an order on Naval Officer in charge of the Fleet for the release of vessel given to the purchaser, and the Registrar of Shipping advised of the transaction. The new owner was then able to submit his Agreement for Sale to the Registrar of Shipping and secure his License or Certificate of Registry.

(8) The cash received by the Committee in these transactions in behalf of the Japanese owners, was disbursed to them after deduction of the 1% service charge, survey fees when applicable and other deductions authorized by the vendors. These Japanese owners liquidated a large amount of their indebtedness in this manner, through the Committee.

Source: Nikkei National Museum, 2010-4-4-2-221-6
www.nikkeimuseum.org

Description of Vessels:

The impounded vessels, as finally listed with the Committee, consisted of the following:

No. of Vessels	% of Total	Type
66	5	Seiners
117	9	Trollers
862	65	Gill-Netters
146	11	Packers
140	10	Cod-Fishers, etc.
1331	100	Total

Vessels varied greatly in age, consequently in value. While information as to age was not available for all vessels, this data was supplied for a large number by the Japanese owners when listing their vessels with the Committee.

The following compilation from this data can be taken as indicative of the relative position by age groups. It should be noted however, that the natural tendency of the Japanese owners in supply this information was (duplicating) towards minimization. They were the vendors of these vessels.

Age	No. of Vessels	% of Total
1 to 3 years	210	18.4
4 to 6 "	209	18.3
7 to 9 "	157	13.8
10 to 12 "	236	20.7
13 to 15 "	175	15.3
16 to 18 "	60	5.2
19 to 21 "	44	3.9
22 to 24 "	34	3.0
25 Years old and over	16	1.4
Total	1141	100%

In normal years there are several hundred fishing vessels built annually in British Columbia, especially of the Gill-Netter type. Construction has practically ceased under the restrictive priority conditions prevailing. As a consequence, the availability of the these Japanese vessels served as a means of permitting the metamorphosis which has taken place in the Fishing Industry of this Province since Japanese fishermen were denied the right to participate therein.

Chronological Review of the Committee's Operations

For the purpose of this review it has been considered advisable to divide the activities into four periods which we designate as follows:--

A - Initial Sales

B - Most Active Sales

C - Declining Sales and Transfer of Remaining Vessels to the Custodian

D - Closing Period

PERIOD A - INITIAL SALES

Until the Naval Service establishment at New Westminster advanced the work of conditioning the vessels concerned, inspection of individual units could be effectively accomplished only by bringing selected boats to New Westminster Terminals for inspection by prospective buyers. This resulted in slow progress in sales in the initial period of operations.

Consultation with the General Supervisor of Fisheries of British Columbia and with other authorities, revealed the desired priority in best serving the various type of fishing. Herring fishing was in progress when the Committee opened its offices and, due to the importance of facilitating the production of a large herring pack needed to meet the urgent requirements of the British Government, preference was given to releasing boats used in this branch of the Industry.

Spring salmon trolling came on in February, Halibut fishing the following month, and the principal Salmon fishing in June. Where ever possible then, preference in releasing vessels was given in that order.

Source: Nikkei National Museum, 2010-4-4-2-221-8
www.nikkeimuseum.org

The principal fishing companies recognized the mutuality of interest in restoring vessels to active fishing and agreed to cooperate with the Committee in every possible way. They explained their position: that they were not interested in the capital investment represented in the purchase of these fishing vessels as such, but acknowledged the necessity of financing white fishermen in support of the policy of the Committee in approving of outright sales only.

In this period there existed an erroneous impression in the minds of certain Japanese groups that they might be allowed to fish under supervision. This built up certain sales resistance, to over-come which the Committee appointed several Japanese recommended by Mr. Kimura, actively to dissipate the impression, and to urge all Japanese owners to take advantage of the facilities offered by the Committee in disposing of their vessels.

In addition to the vessels in the Fraser River, descriptions of the impounded vessels at Prince Rupert and out-ports were segregated and their availability advertised; and the fishing companies having interests in the districts concerned, fully advised.

Amongst the vessels impounded were many which, while operated by Japanese fishermen, were actually owned by the fishing companies. Some of these vessels too, sustained damage and/or loss of equipment while in Naval Custody. On verification of approved ownership, and after survey in the event of claim for loss or damage, these vessels were accordingly released. Such vessels have been reported under the caption "Released to Owners"

Towards the end of this period, a sufficient number of vessels was available for inspection at Fraser River moorings to warrant the inauguration of a regular ferry service from New Westminster Terminals.

Source: Nikkei National Museum, 2010-4-4-2-221-9
www.nikkeimuseum.org

The following vessels were released during this period: i.e., from the opening of the Committee's offices to February 28th, 1942.

Type of Vessel	Sales	Released to Owners	Req's'd by Services	Total Released
Seiners	11	1	11	23
Trollers	4	0	1	5
Gill-Netters	26	49	0	75
Packers	4	3	13	20
Cod Boats, etc.	1	8	2	11
Total	46	61	27	134

In this period 343 persons inspected the vessels and 63 vessels were surveyed by the surveyors of the Naval Service and the Committee.

Period of Most Active Sales

The anticipated increase in sales activity did not open up immediately after the inauguration of regular inspection service at the moorings. It was found that the deterent factor was a disagreement as to price. In listing their vessels with the Committee, the majority of Japanese owners quoted an excessive price. This was generally higher than the prospective purchasers was prepared to pay, consequently the Committee engaged a highly qualified fishing vessel valuator to survey all unsold vessels and place a fair value on each unit. The value so determined was used as a basis to establish what became known as the Committee's "Suggested Negotiating Price". Cards were printed showing this negotiating price, and one posted in a window of each wheel house.

This action at once greatly stimulated negotiations and the period of most active sales consequently occurred in March, April, and early in May. 256 vessels were sold in March, 237 in April, and 132 in May.

Source: Nikkei National Museum, 2010-4-4-2-221-10
www.nikkeimuseum.org

The method adopted in surveying vessels for alleged damage or loss of equipment was explained on page hereof. No provision for the payment of the ensuing claims had been made when this sales period opened. The Committee recommended that the necessary finances should be provided for this purpose and suggested that the offices of the Committee be utilized to prepare the necessary documents and submissions to the end that approved claims be promptly paid. This recommendation was accepted and the necessary authorization given effect through Orders-in-Council P. C. 3737 - May 5th 1942, and P. C. 6787 July 31st, 1942.

For the purpose of reference, we shall discuss this factor in more detail later in this report under the caption - "Naval Claims for Loss and Damage".

By the middle of May over 600 boats had been sold, and all these sales were consummated after free negotiation between buyer and seller. When the requirements of the Committee were understood by the Japanese owners, the majority became reconciled to the disposal of their vessels and cooperated to this end. This is exemplified in the fact that while the simple arbitration procedure of the Committee was well understood, only in one case was this arbitration requested to settle a price dispute and both parties were completely satisfied with the award.

However, in the latter part of May it became evident that certain Japanese groups were determined to retain ownership of their vessels and leave it to Government agency to continue their care and upkeep, indefinitely. Inasmuch as these groups had been afforded an equal opportunity to sell as the cooperating majority, and in view of the fact it was essential to relieve the Navy Service from the care of the vessels remaining in custody, as quickly as possible, the Committee adopted the following resolution,-

Source: Nikkei National Museum, 2010-4-4-2-221-11
www.nikkeimuseum.org

"When a bona fida offer to purchase a vessel is made by an eligible applicant and the price is deemed fair, but not less than "suggested negotiating price", and the Japanese continues to refuse to sell, or places an unduly high price on his vessel and refuses to arbitrate, the Committee will sell the vessel at a price determined as fair by them, accepting cash payment therefor which shall be held in trust until the Japanese owner completes the transaction by delivering his licence or register and executing Bill of Sale.

The new owner to be given a letter or prepared form, addressed to the Registrar of Shipping, of a nature acceptable to him. This form will permit the new owner to operate the vessel, pending completion of permanent documents".

152 vessels were sold under this "Forced Sales" plan. Following the consummation of a forced sale, the Committee advised the former Japanese owner of the details of the sale, and of the proceeds available to him on the execution of the regular sales agreement form furnished by the Committee. Approximately two-thirds of these owners regularized the sale by executing the "forced sales" document, and in these cases, the net amount accruing was remitted by the Committee to the vendor at his evacuation camp.

The completed bill of sale then was forwarded to new owner, thus enabling him to obtain a clear title. The Committee was under obligation to the remaining new owners similarly to clear their titles. Consequently, on explaining the situation to the Custodian of Enemy Property, he under the authority vested in him, executed bills of sale for the vessels concerned, in behalf of Japanese owners. The titles were thus cleared on all the remaining vessels sold under this plan and the net amounts due Japanese owners, remitted according to the Custodian.

The total value of all sales under this plan amounted to $72,031.00. The Committee's "suggested negotiating price" was $70,110.00 and the actual surveyed value was approximately $60,000.00; hence in total, the owners received 2.7% above the negotiating price and 18% above the

Source: Nikkei National Museum, 2010-4-4-2-221-12
www.nikkeimuseum.org

survey price, on the total 152 vessels concerned.

Up to this time no releases were approved without assurance that the vessel purchased would be used by the new owner in the Fishing Industry of British Columbia. In the latter part of May, the Committee reached the conclusion that a position had been attained, whereby the vessels then returned to the Fishing Industry through sales and releases, insured that the production of the Industry would not suffer by reason of Naval impoundment action.

In view of this and with the consent of the Minister of Fisheries, the remaining vessels were offered to the general public and wide publicity of this policy given through the press. Very few sales to the general public resulted, chiefly due to the rigid gasoline restrictions, but also for the reason that the vessels available were not well adapted to other than Fishing purposes.

During this period the following vessels were released:-

Type of Vessel	Sales	Released to Owners	Req's'd by Services	Total Released
Seiners	22	0	0	22
Trollers	33	3	10	46
Gill-Netters	463	86	8	557
Packers	75	3	15	93
Cod Boats&Misc.	32	25	0	57
Total	625	117	33	775

Approximately 2858 people visited the fishing fleet in this period - 364 surveys were made in respect to claims for loss and damage and 713 vessels were surveyed for valuation.

P E R I O D C

PERIOD OF DECLINING SALES AND THE TRANSFER OF VESSELS REMAINING UNSOLD AT AUGUST 5, 1942 TO THE CUSTODIAN OF ENEMY PROPERTY - JUNE 1st to AUG. 5, 1942

As June advanced, it became evident that the capacity of the current market to absorb these vessels was nearing exhaustion. The principal objective of the Committee in respect to the needs of the Fishing Industry having been attained, it became imperative that Navy personnel, at the New Westminster establishment, be relieved.

Prolonged negotiations took place with the fishing companies in June and July with object of having them take over the remaining vessels either by purchase or under a bailment plan with option to purchase. For a time it appeared that one or other of these plans might be successful, but in the end only one Company; Nelson Bros. Fisheries Ltd., concluded an arrangement. They took over the responsibility of 52 vessels on a plan which included an option to purchase, and/or the privilege of using any one or more vessel during the current fishing season at a nominal rental of $25.00 per boat.

Early in July when it was apparent that the fishing companies would not take all remaining vessels, the Committee recommended that the Custodian of Enemy Property assume this responsibility. This recommendation was approved and the transfer authorized through Order-in-Council P. C. 6247 July 20th, 1942. The Committee assisted both agencies in arranging the details of giving effect to the transfer, which was consummated on August 5th, 1942.

This transfer included 97 vessels at New Westminster, 16 at Prince Rupert and several at outlying canneries, and responsibility for the supervision of Nelson

Source: Nikkei National Museum, 2010-4-4-2-221-14
www.nikkeimuseum.org

Coincident with the release of vessels by Naval Authority, a joint survey was made by the surveyors of Naval Service and the Custodian's office in order to fix responsibility for loss or damage claims.

A summary of vessels released during the period June 1st to August 5th inclusive follows:

Period C - 1 June 1st - August 5th, 1942

Type of Vessel	Sales	Released to Owners	Req'n'd by Services	Transf'd to Custodian	Total
Seiner	13	0	3	1	17
Troller	16	2	- 2	44	60
G.Netter	138	12	- 1	70	219

Cod Boats	21	7	- 1	43	70
Total	202	24	-17	176	385

P E R I O D D

CLOSING PERIOD - AUGUST 5th to NOVEMBER 1942

Order-in-Council P.C. 3737 provided only for the transfer of the vessels unsold at July 31st 1942 together with the records pertaining thereto. No provision was made for the transfer of records and unfinished business of the Committee concerned with the vessels sold or released by It, nor for the administration of Naval claims.

The Custodian agreed however, to assume this added responsibility, provided the Committee would bring this work to as nearly a state of completion as practical, prior to transfer. It was also mutually agreed that the Committee would release to the Custodian's office at the time of such transfer, such experienced members of its staff as was deemed necessary.

Source: Nikkei National Museum, 2010-4-4-2-221-15
www.nikkeimuseum.org

The work concerned included completion of - Naval claims, purchase of Royal Canadian Service Vessels, settlement of undisbursed amounts due Japanese owners and the assembly of permanent records after auditing by the Finance Department auditors.

The assembly and completion of documents supporting claims against Naval Service proved a slow process in many cases, due chiefly to the delay in securing the necessary papers from the Fishing Companies and evacuated Japanese owners. Considerable confusion also ensued in the identification of vessels concerned from the similarity in names. The work involved occupied the major part of the Committee's reduced staff during this closing period. Reference schedule page

Instructions to purchase Service vessels were received in the latter part of July from the Department of Munitions and Supply. These included all vessels requisitioned from the Japanese Fishing Fleet, 26 by Naval Service, 10 by Army Service Corps, and 6 by the Air Force. At the time these vessels were requisitioned early in the year, values were established by the Committee on chartering and based on surveys made by Lloyds Register of Shipping. It was intended that vessels should be chartered from Japanese owners, and it was not until July that this policy was changed and outright purchase decided upon.

These purchases were effected on the basis of Lloyd's surveyed price, without regard to pro rata charter fees from time of requisitioning to date of purchase.

The Japanese owners were all living at evacuation camps which required that negotiations be carried on by correspondence, and while some difficulty was experienced in satisfying the vendors as to the cancellation of interim charter fees, the purchase order was brought to a practical conclusion during this final period.
